Qmlativ Business New Features & Roadmap

Jordan Steltenpohl
Product Manager - Qmlativ Business

Session Agenda

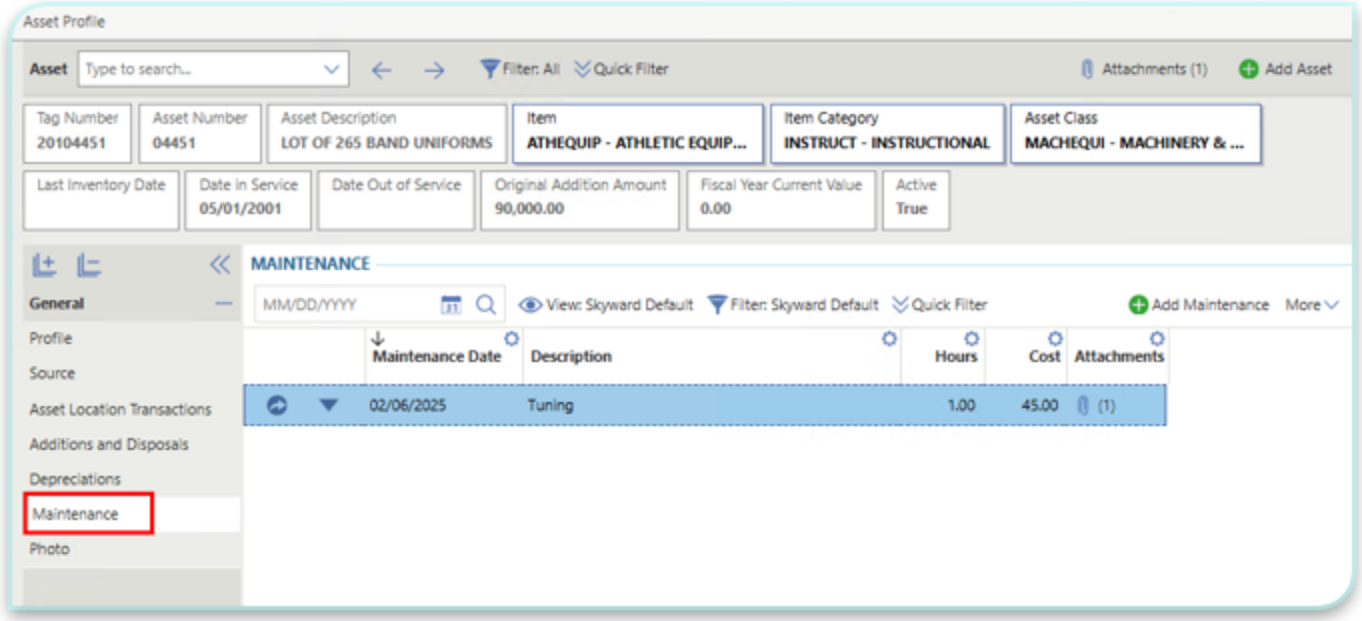

- Finance New Features
- Human Resources New Features
- Payroll New Features
- 2026 Qmlativ Business Roadmap

Finance New Features

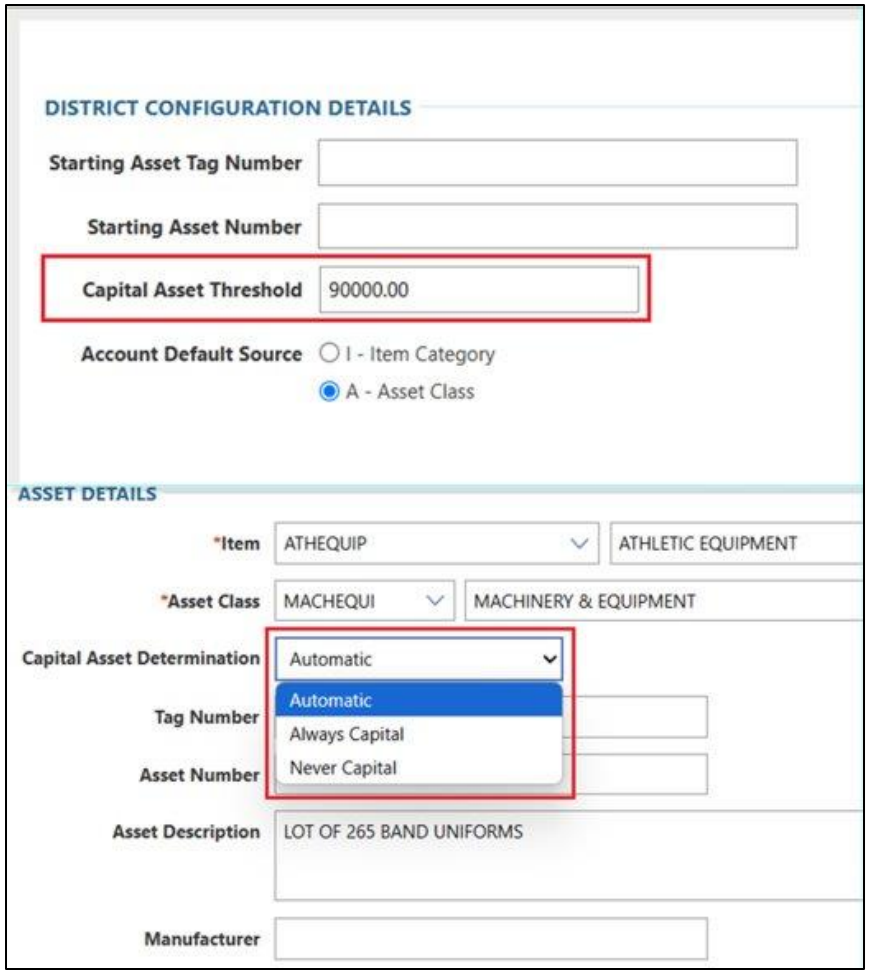

Maintenance Tab on Asset Records

- Track maintenance history on asset records
- Identify trends in equipment and the assets you're sinking funds into maintaining

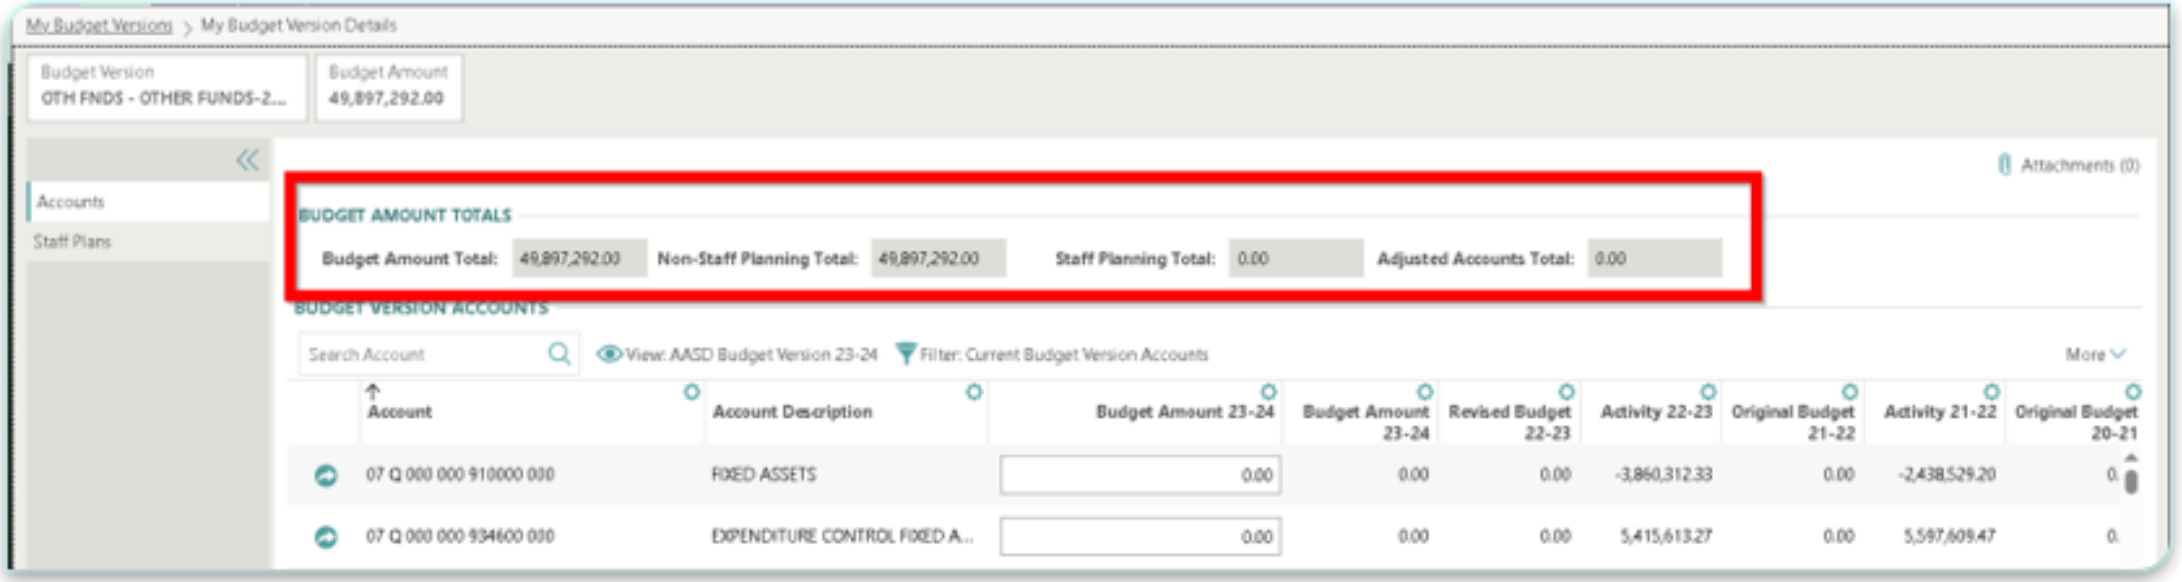

Capital Asset Threshold

- Configure the Capital Asset Threshold Amount (often $5,000)
- Have the system automatically flag the asset based on the threshold, or manually set as Capital/Not Capital

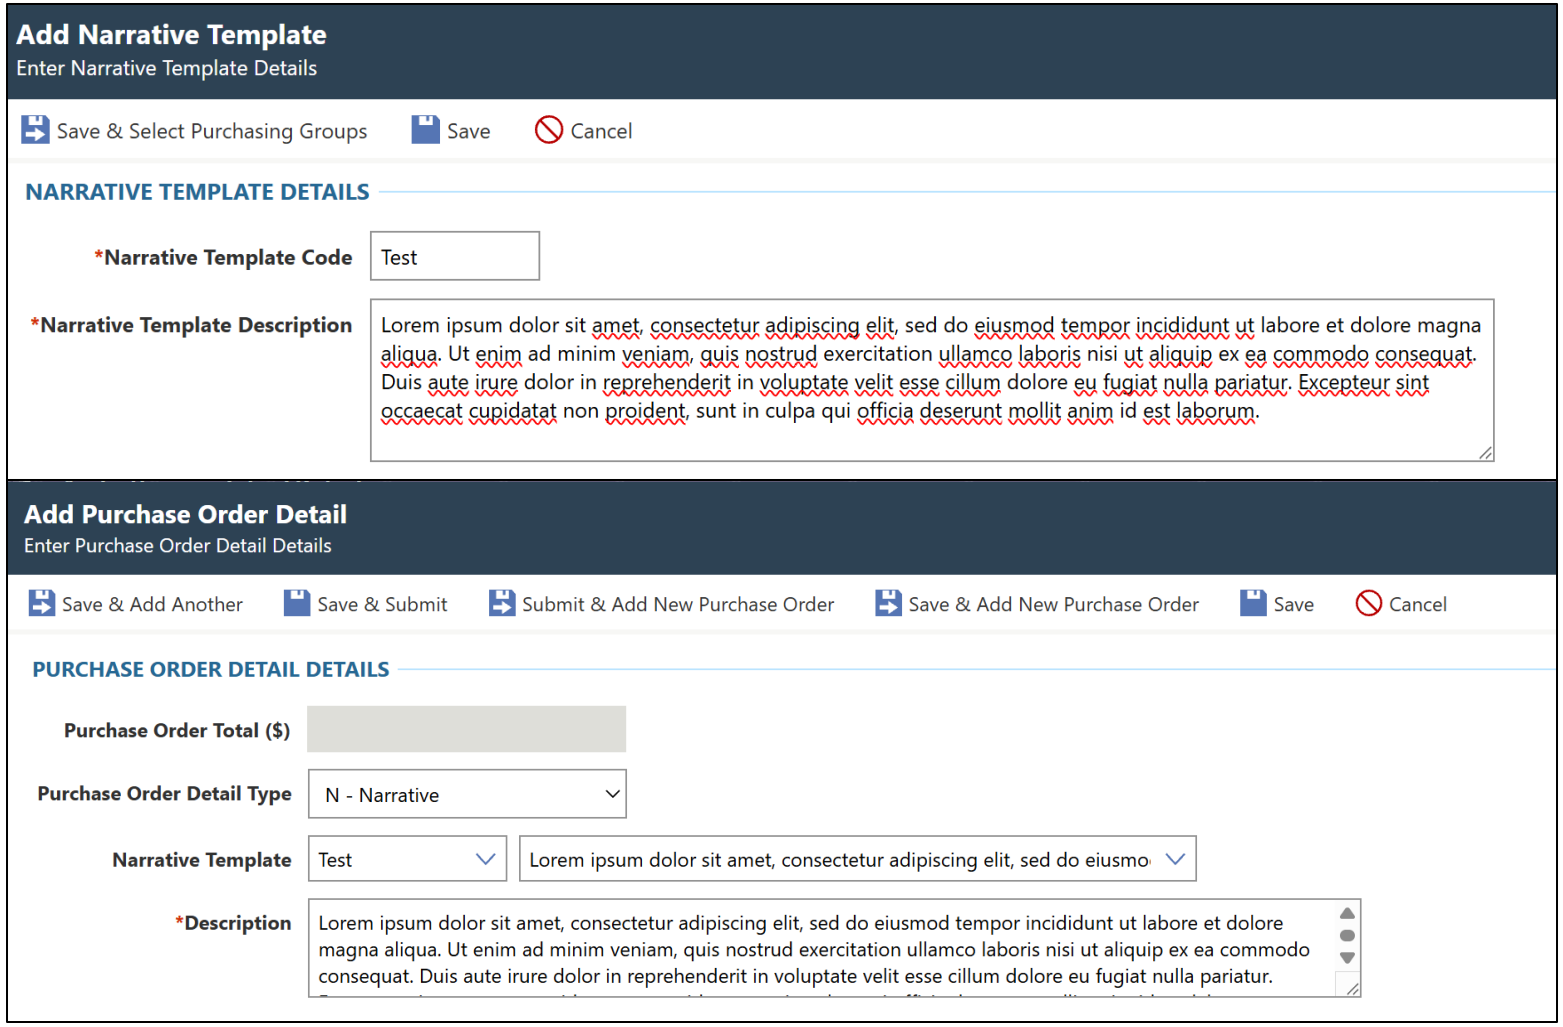

Enhanced Budget Amount Calculations*

- Budget Amount Totals within Budget Versions are now filtered to only show totals for the accounts you have access to

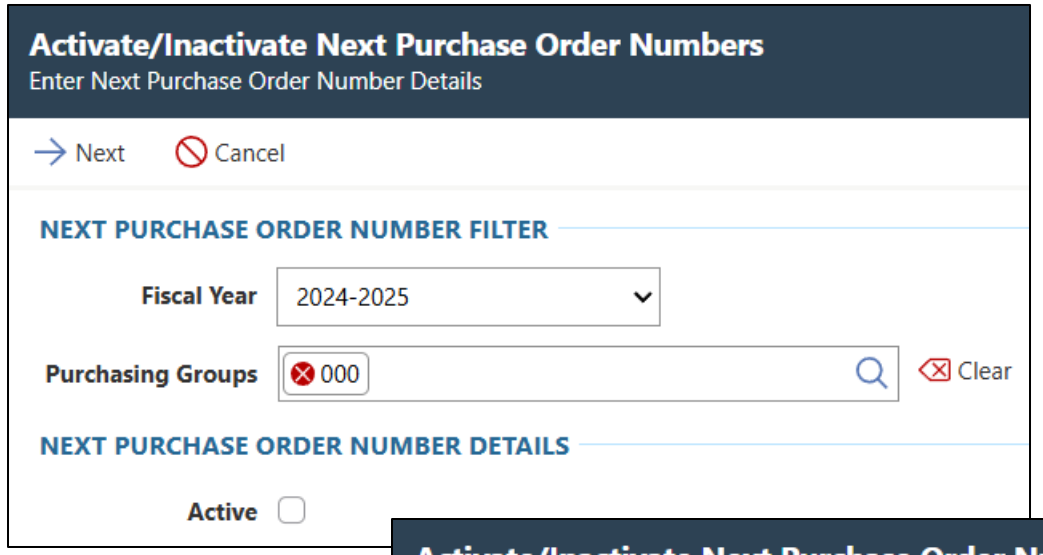

Narrative Templates for Purchase Orders*

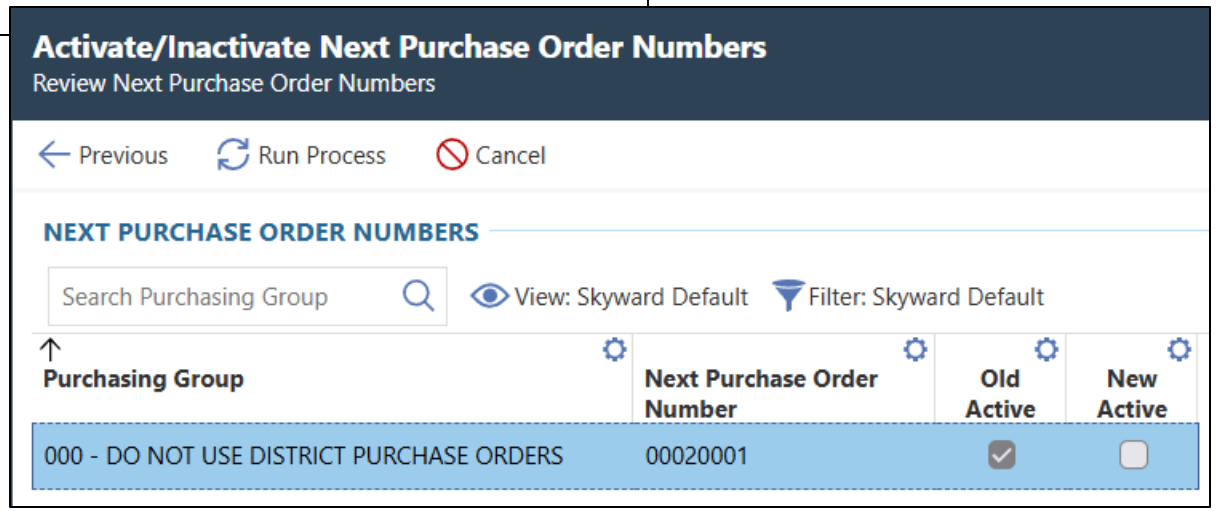

- Create a table of narrative templates to be shared across all POs
- Increased efficiency of PO entry – no need to type every narrative line

Mass Inactivate Next PO Numbers*

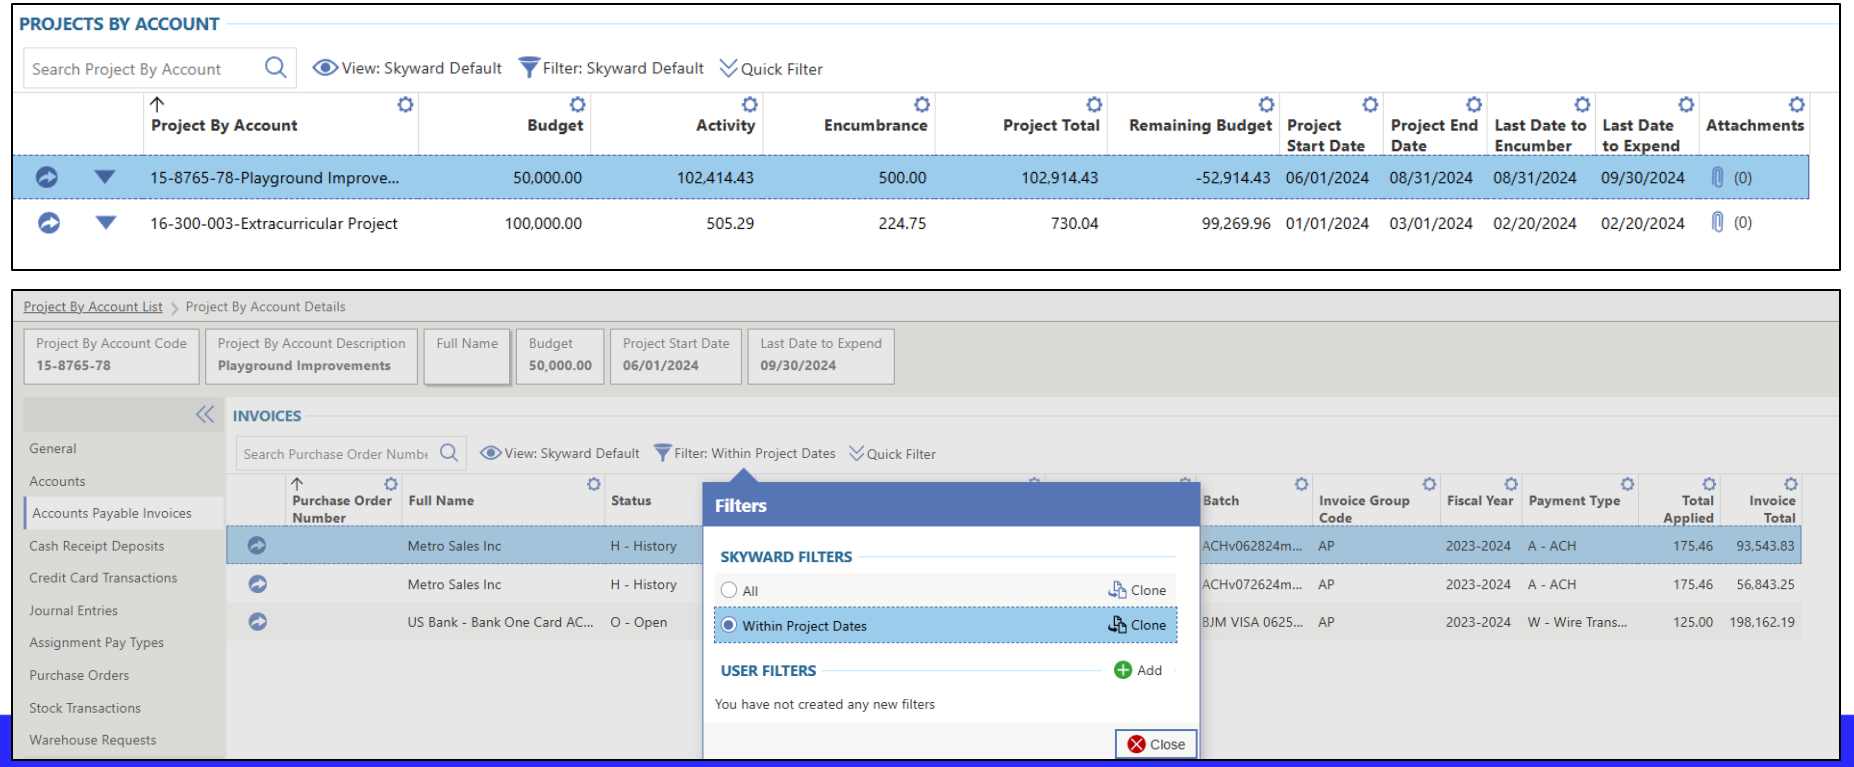

- This is a utility found within your Purchasing Group list to mass inactivate your next PO numbers.
- Helps to quickly inactivate previous year PO numbers during year end.

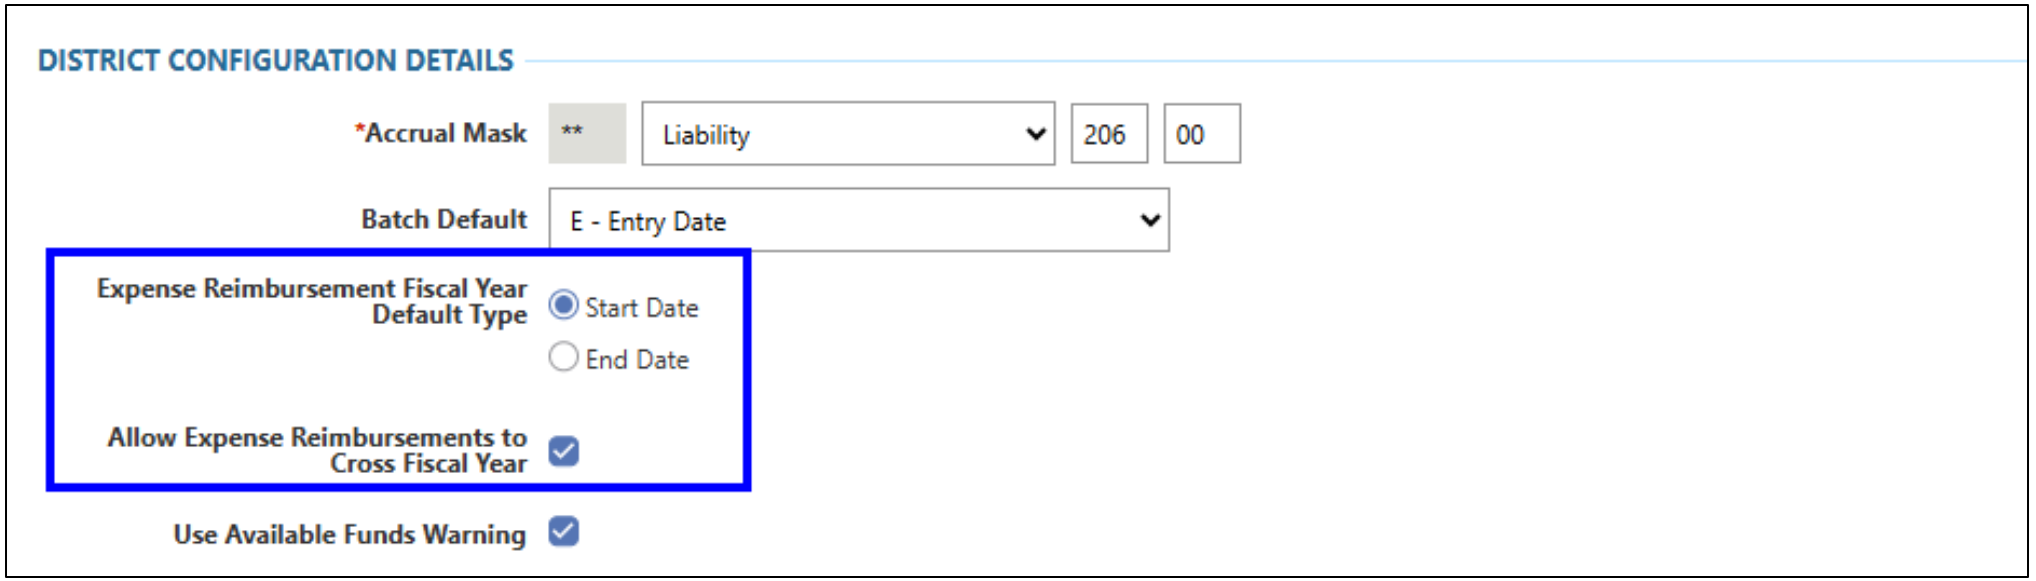

Date Validation on Project/Grant by Account*

- The activity and encumbrance fields within your project or grant by account records will only display activity between the start date and last date to expend.

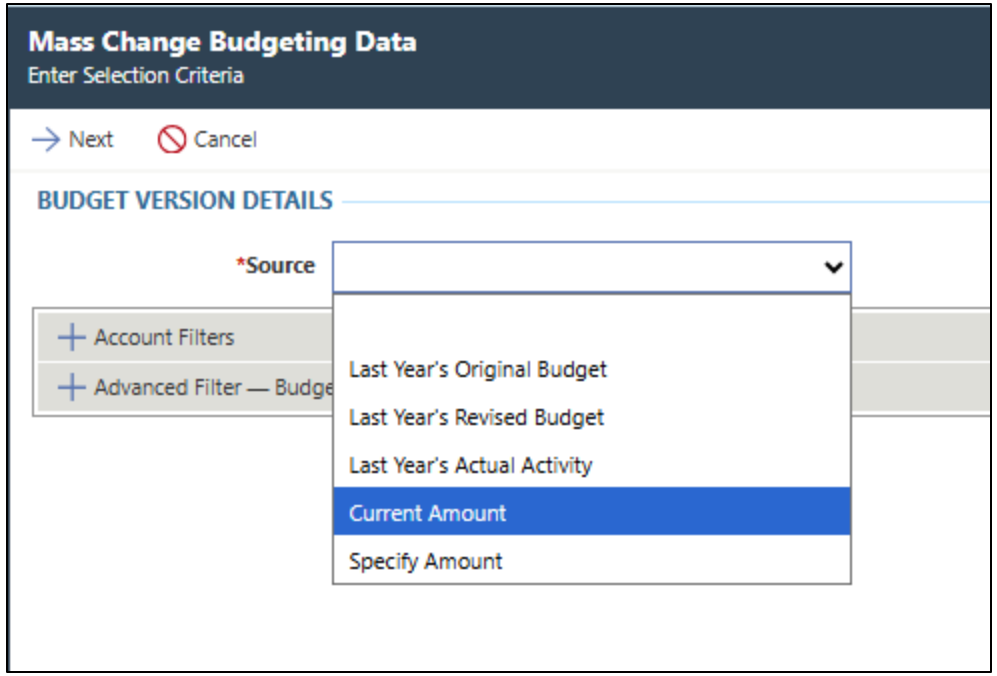

Expense Reimbursements Across Fiscal Years

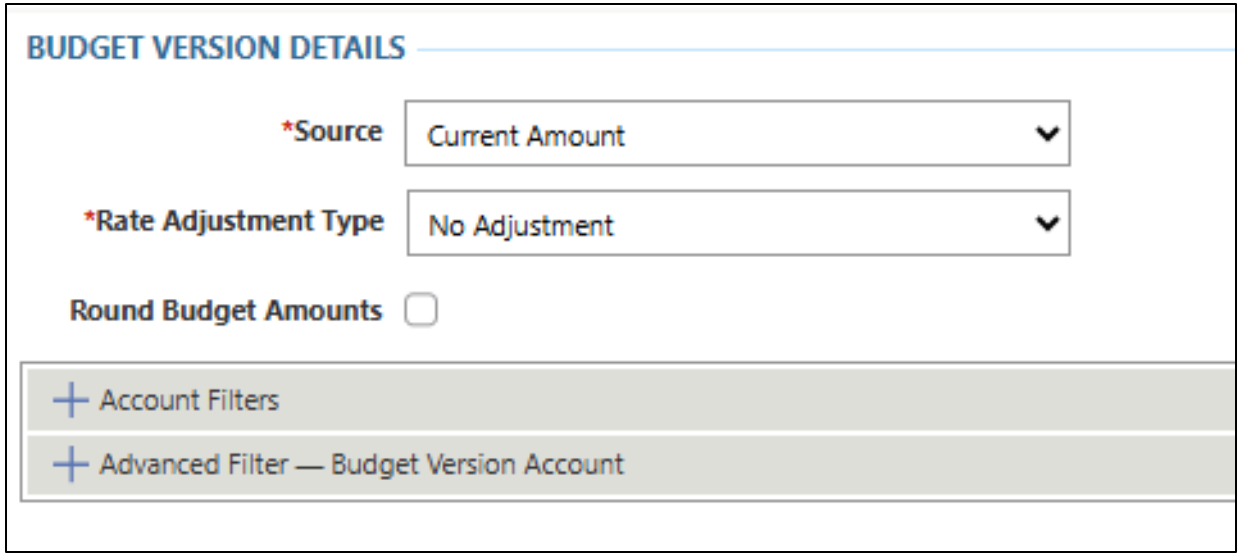

A configuration has been added to allow expense reimbursements to span two fiscal years

Current Budget Amount as Source Type

The Mass Change Budget Data Utility allows you to mass change the budget values currently in your working budget version for the new year.

Finance Reporting Updates

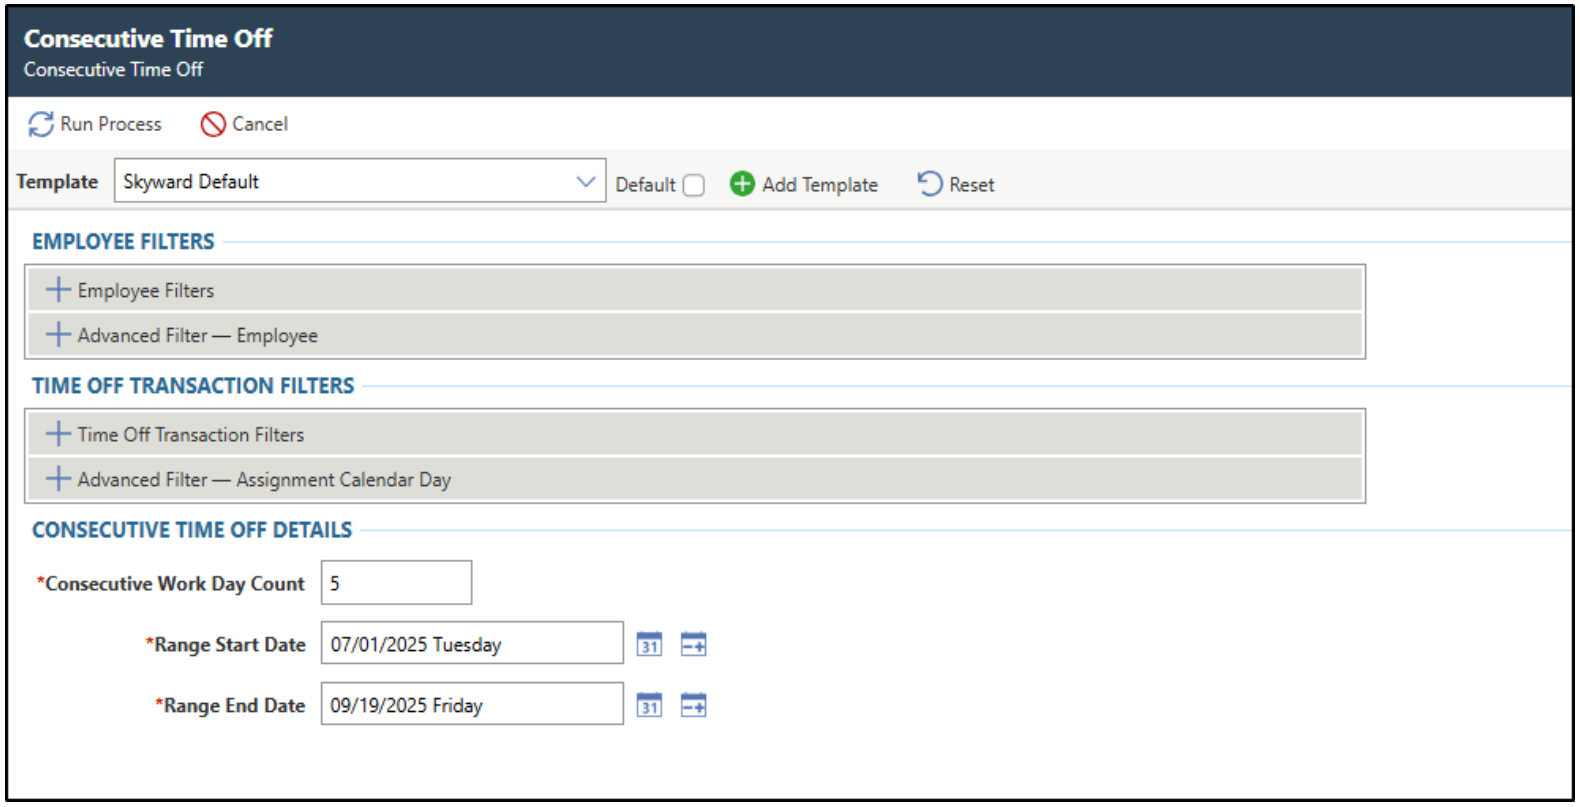

- Excel version of Account Activity Detail Report
- YTD values added to Balance Sheet Detail by Fund
- Select multiple AP Runs on AP Check Vouchers
- Statement of Account (AR) Reports
  - Added an option to hide payment history (print version only).
  - Added an option to only display outstanding invoices (print version only).
  - Added standard AR Invoice filters (print version only).
  - Added invoice aging data.
  - Added copies of outstanding invoices.
  - Various UI improvements, such as district logo.

Human Resources New Features

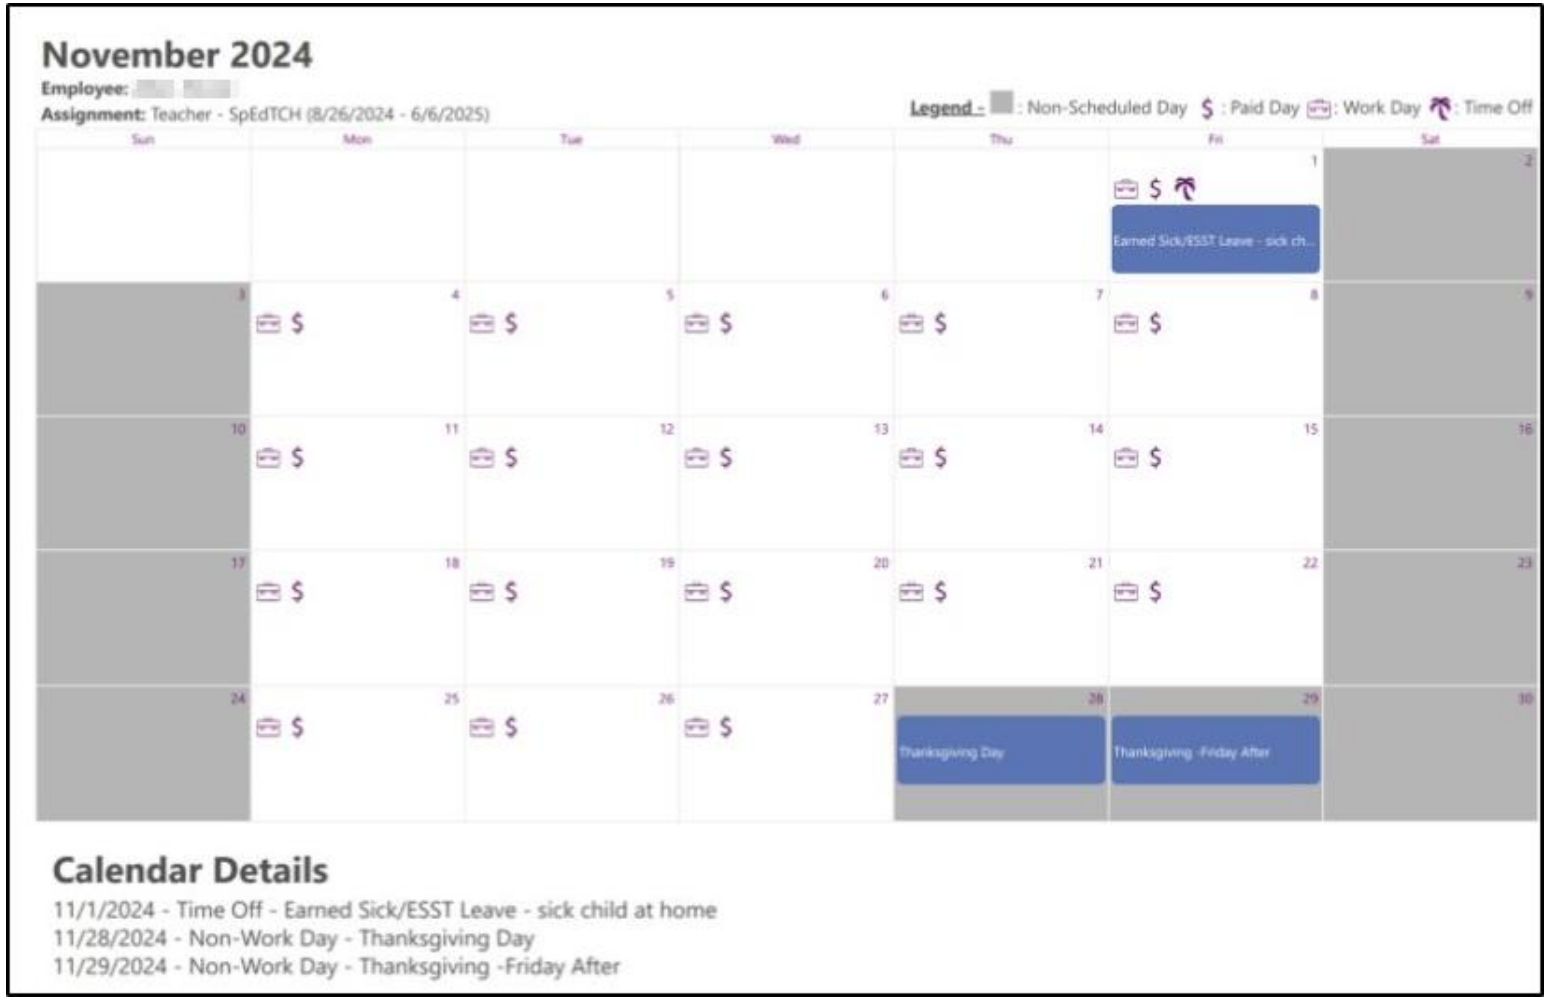

Consecutive Time Off Days

- Easily identify when employees time off on consecutive days.

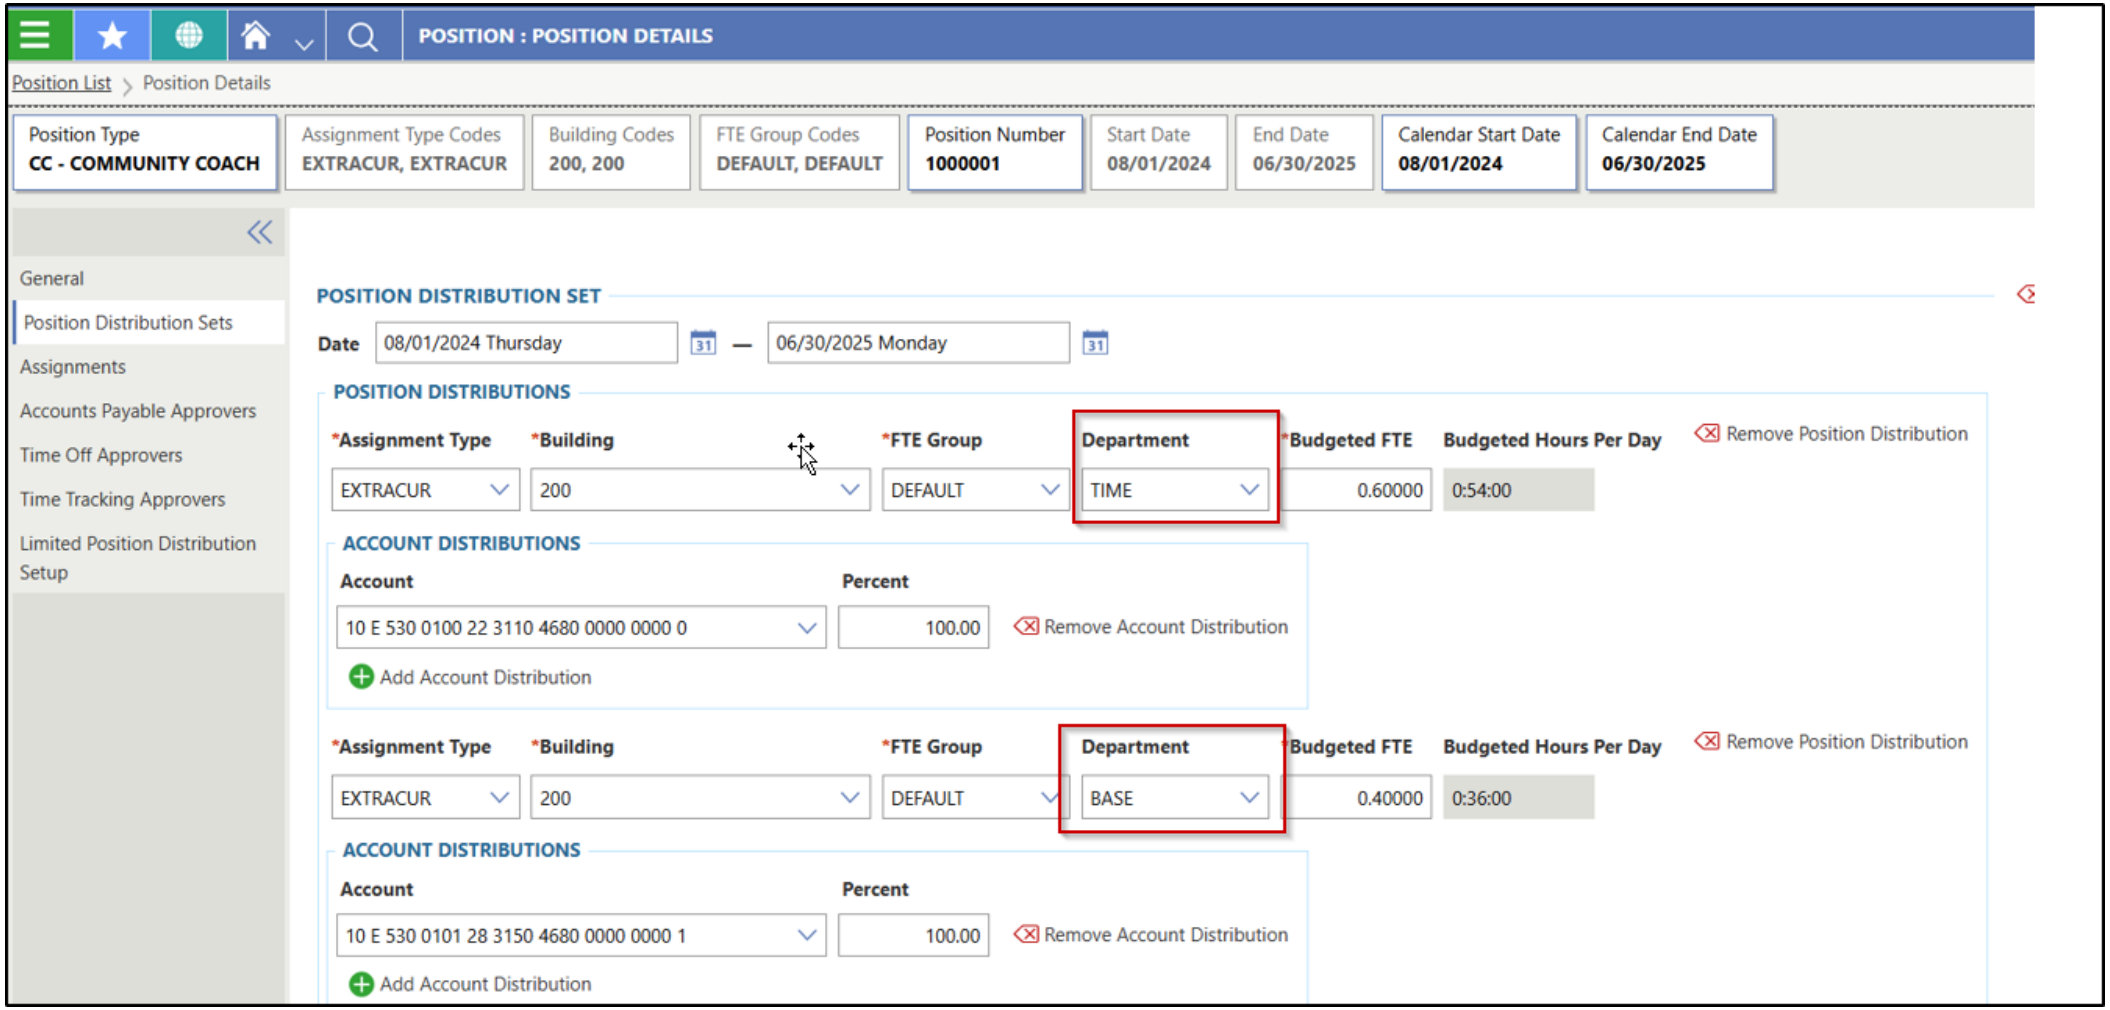

Print Assignment Schedule*

- Ability to print Assignment Schedules in Employee Profile and Employee Access.

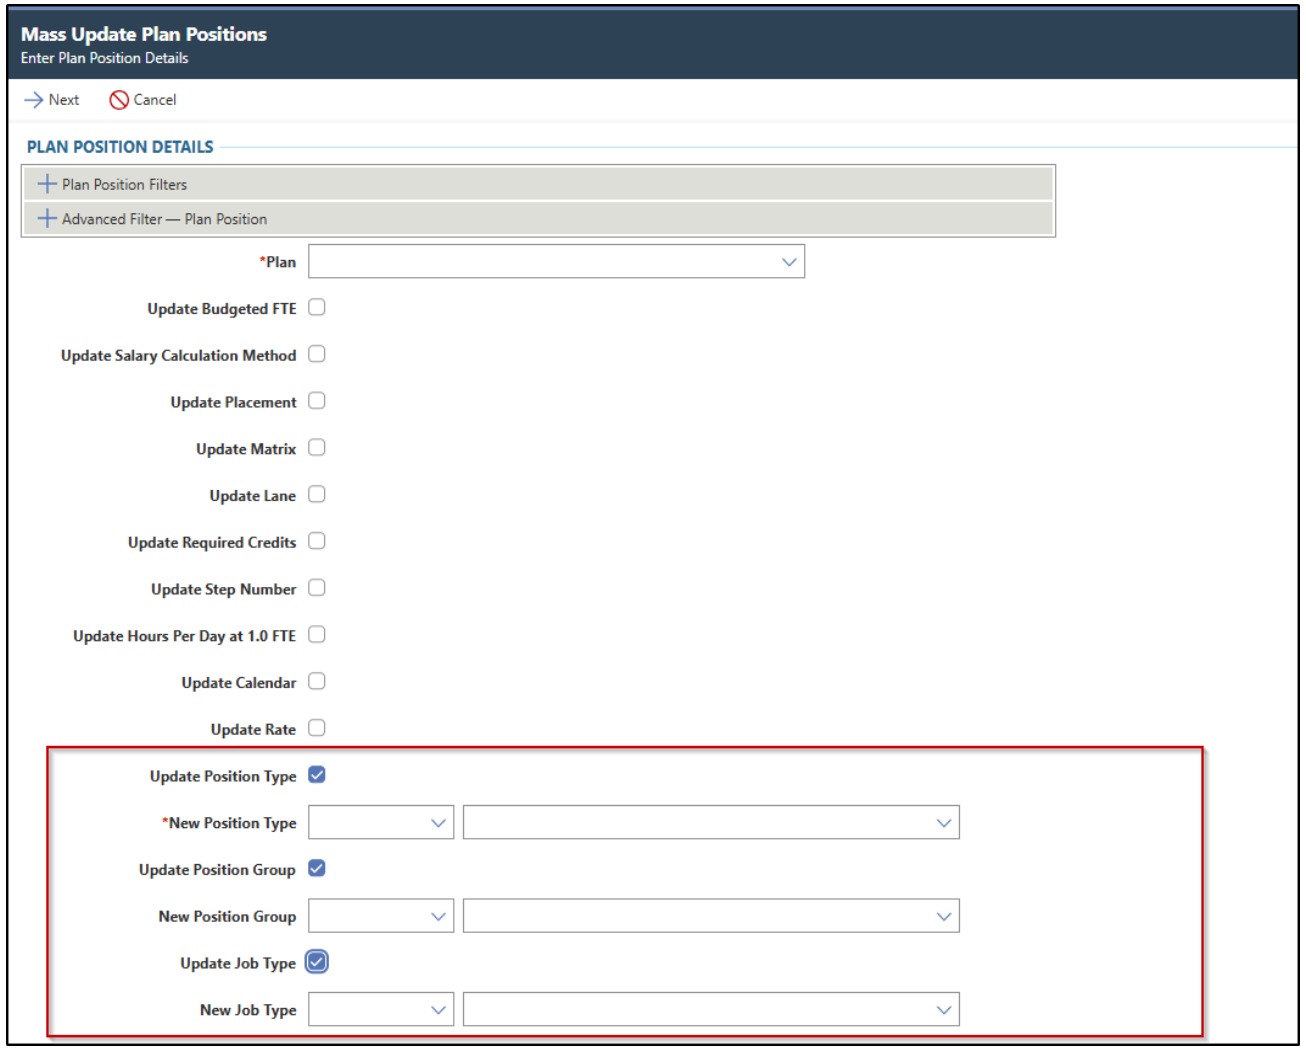

Allow Unique Position Distributions by Department

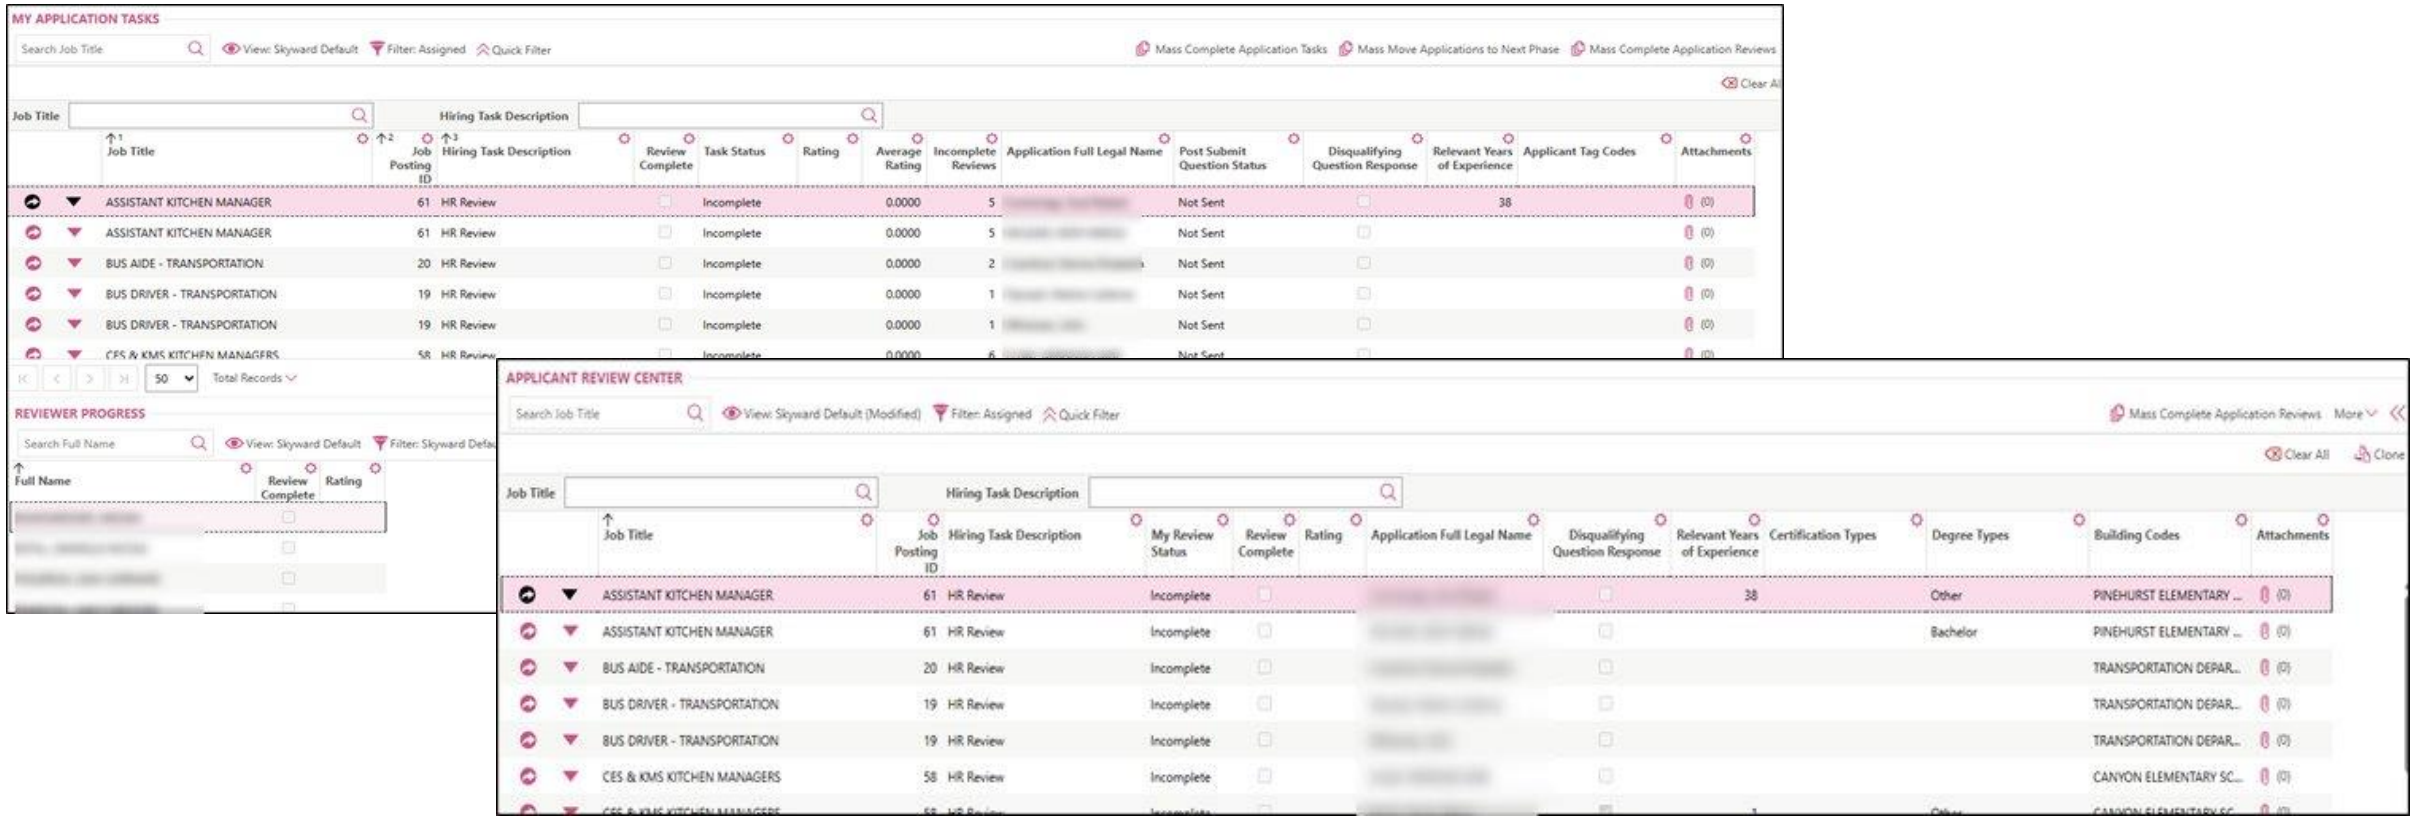

Mass Update Plan Position Options

- This utility will now allow Position Types, Position Groups and Job Types to be updated.

Screener Task Clarity

Added clarity for screeners to know when they have applicants to review and where to review those applicants.

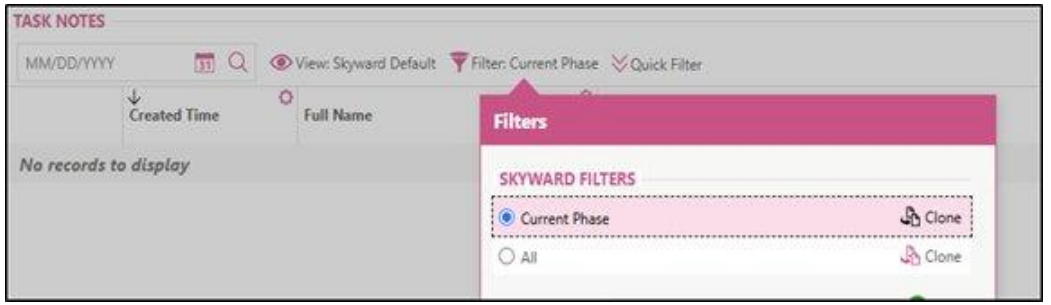

Screener Task Clarity Continued

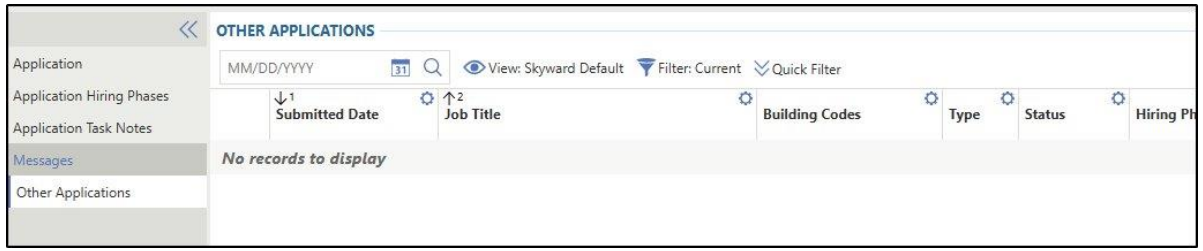

Create Live Tiles for Reviewers and Hiring Managers to quickly identify when new applicants are assigned to them for review.

Tasks notes can be viewed throughout all phases that screener is assigned.

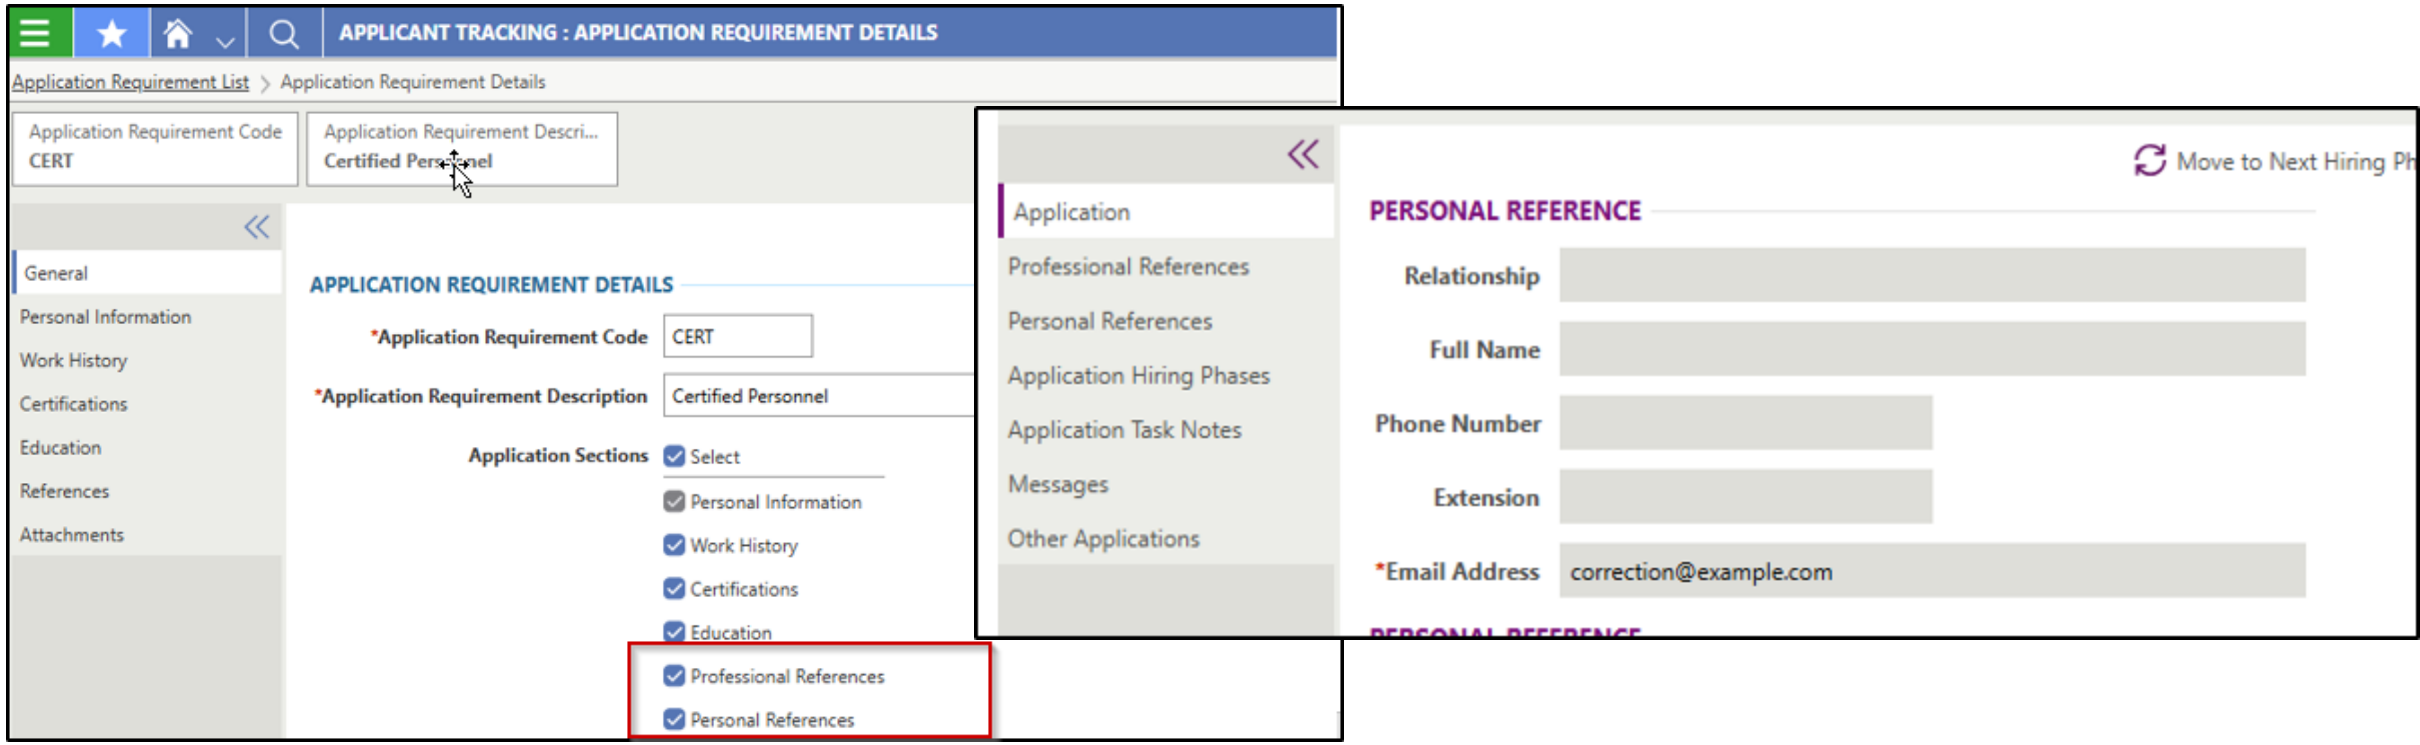

View all the positions that an applicant has applied for via the "Other Applications" tab. Allows screeners to easily identify the history of that applicant at their district.

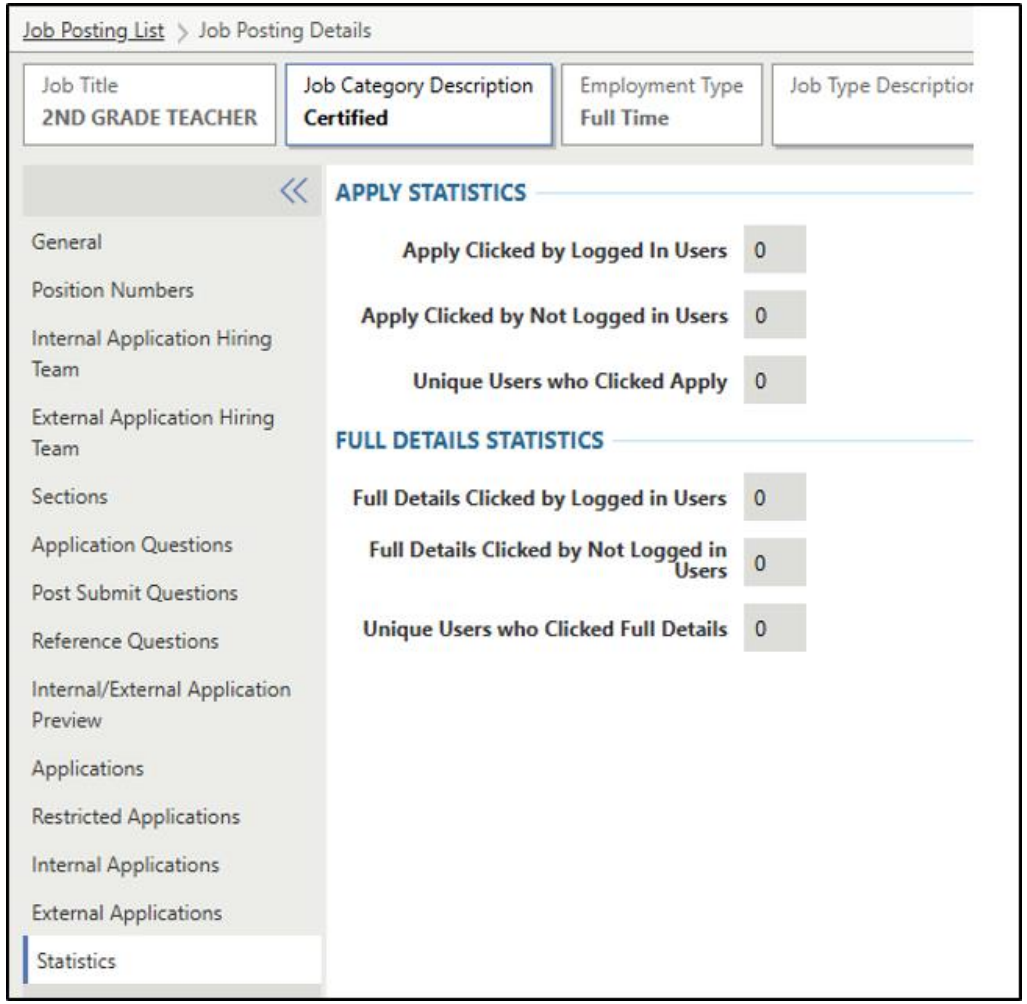

Personal and Professional References*

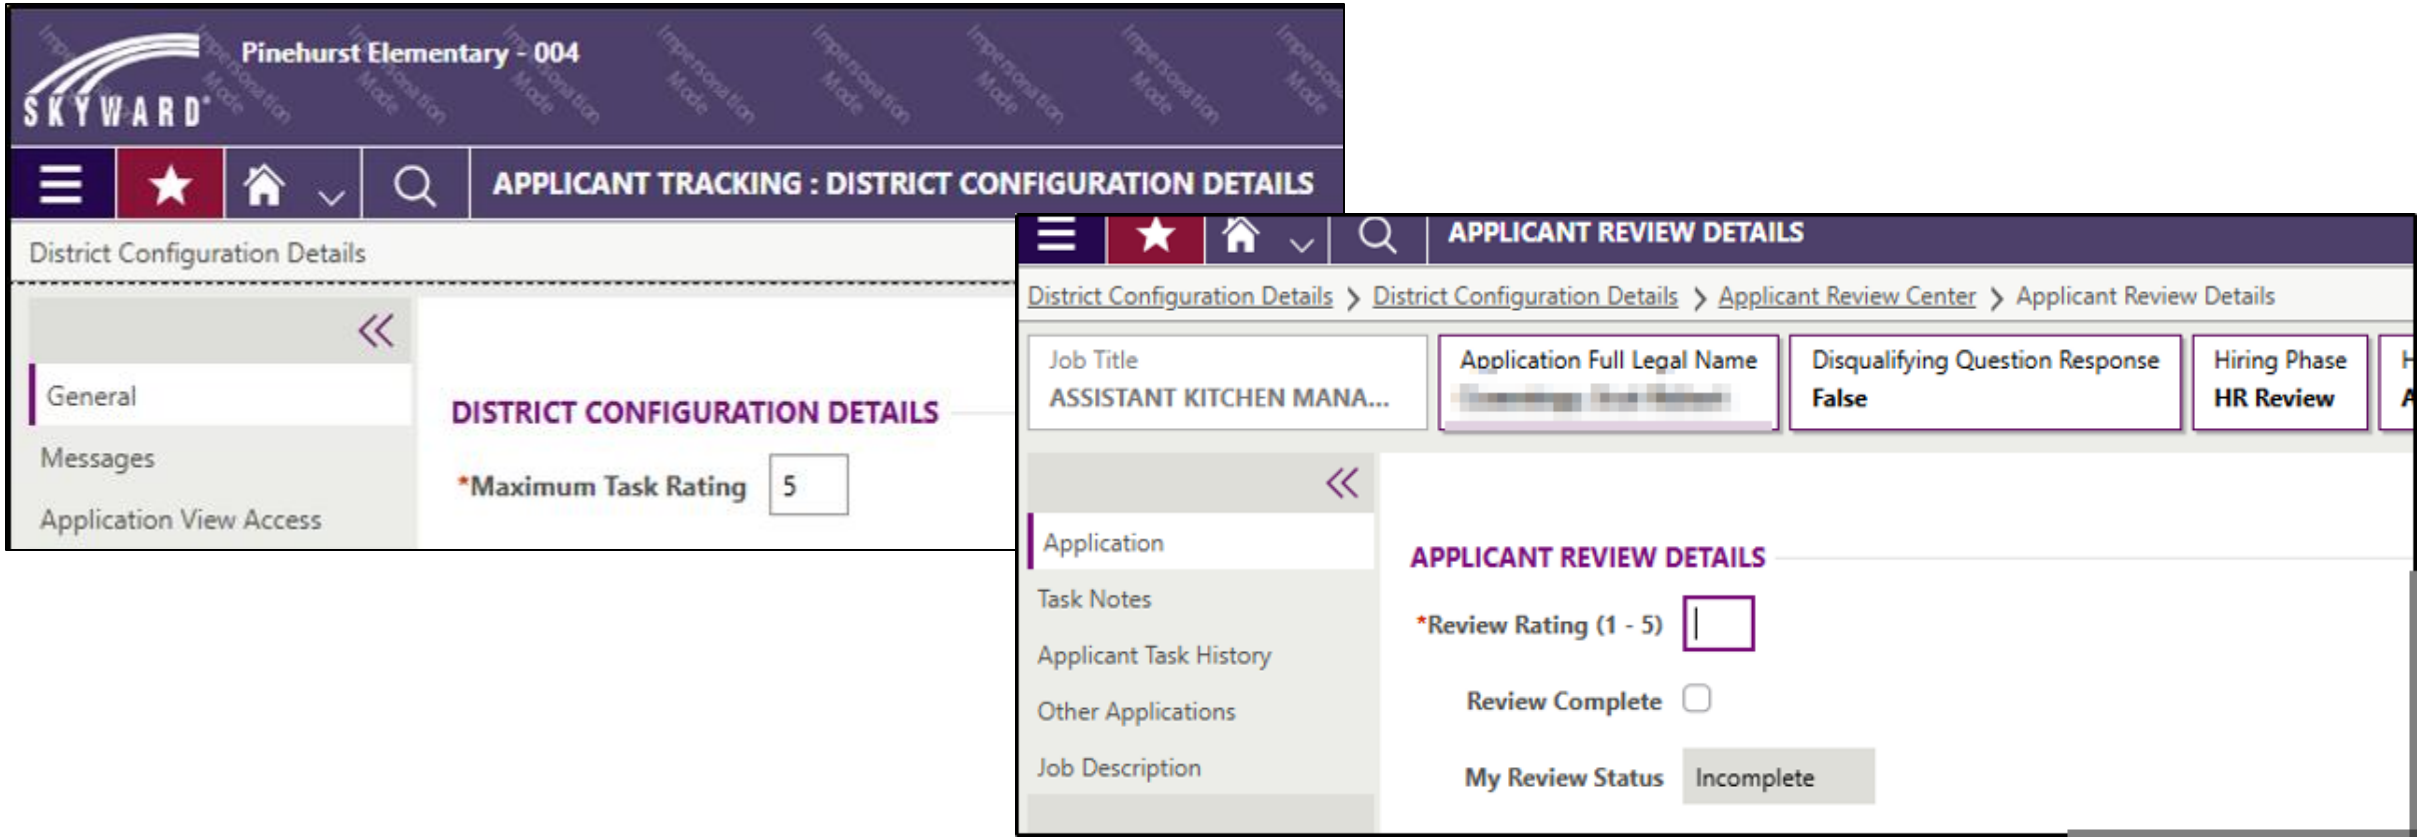

Job Posting Statistics*

- Easily track how many views and clicks are happening on each job posting!

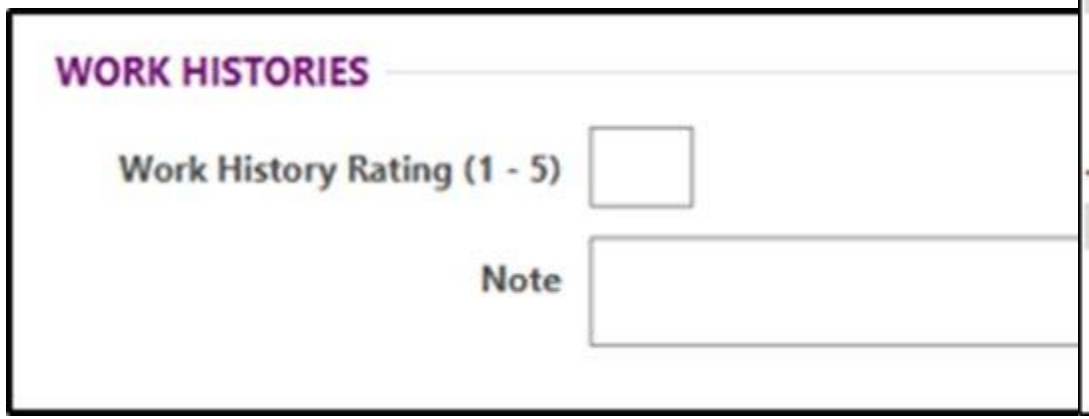

Customizable Numeric Scoring*

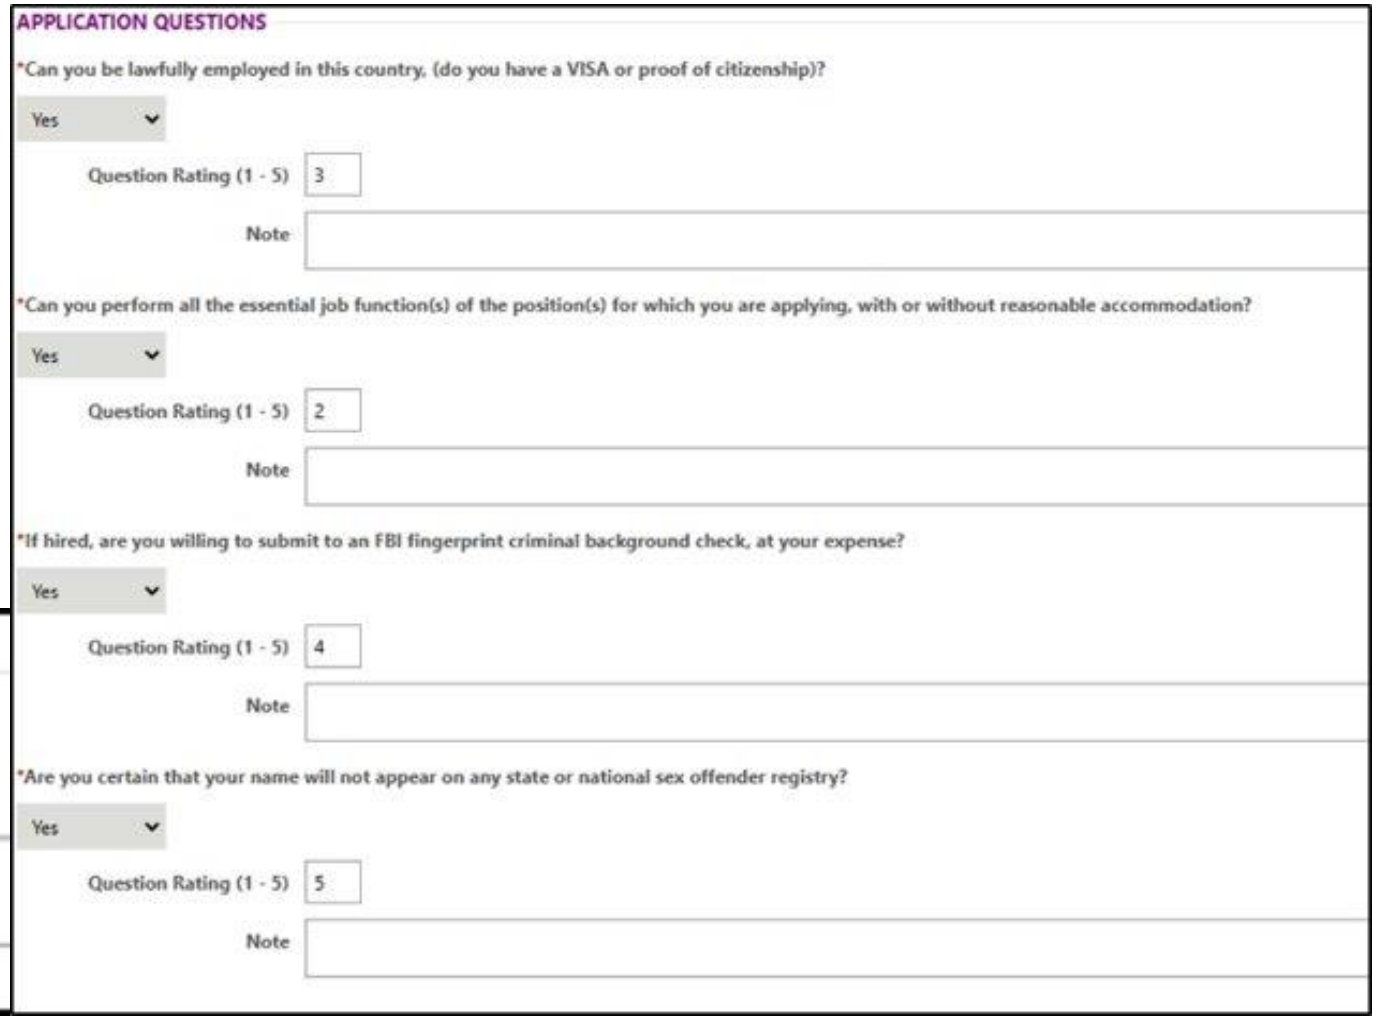

- A maximum task score setting has been added.

Section and Question Based Scoring

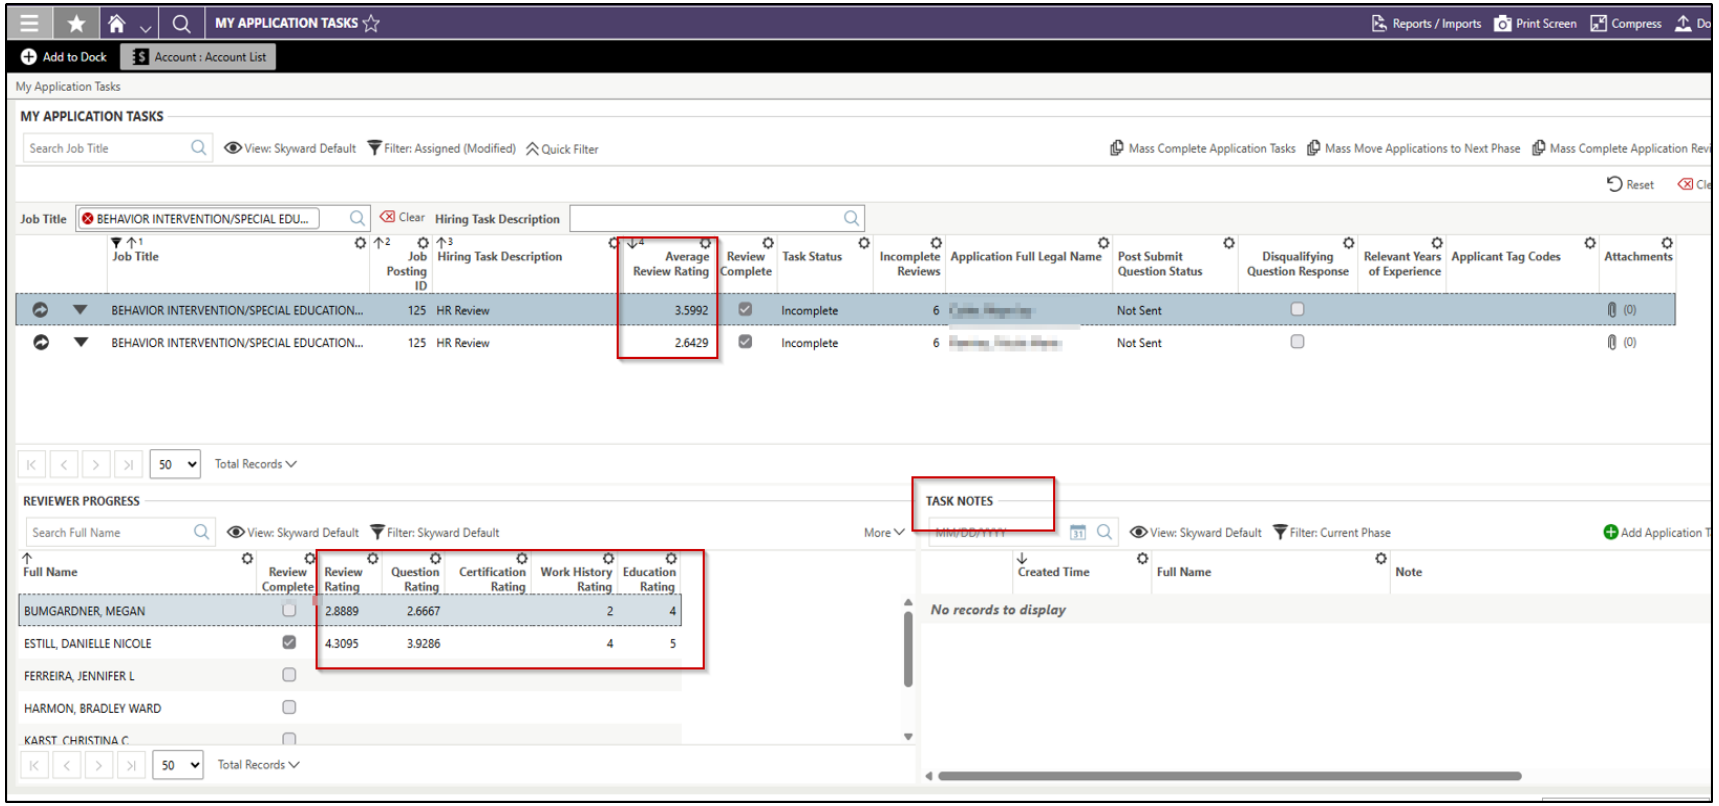

- Score application sections and individual application questions

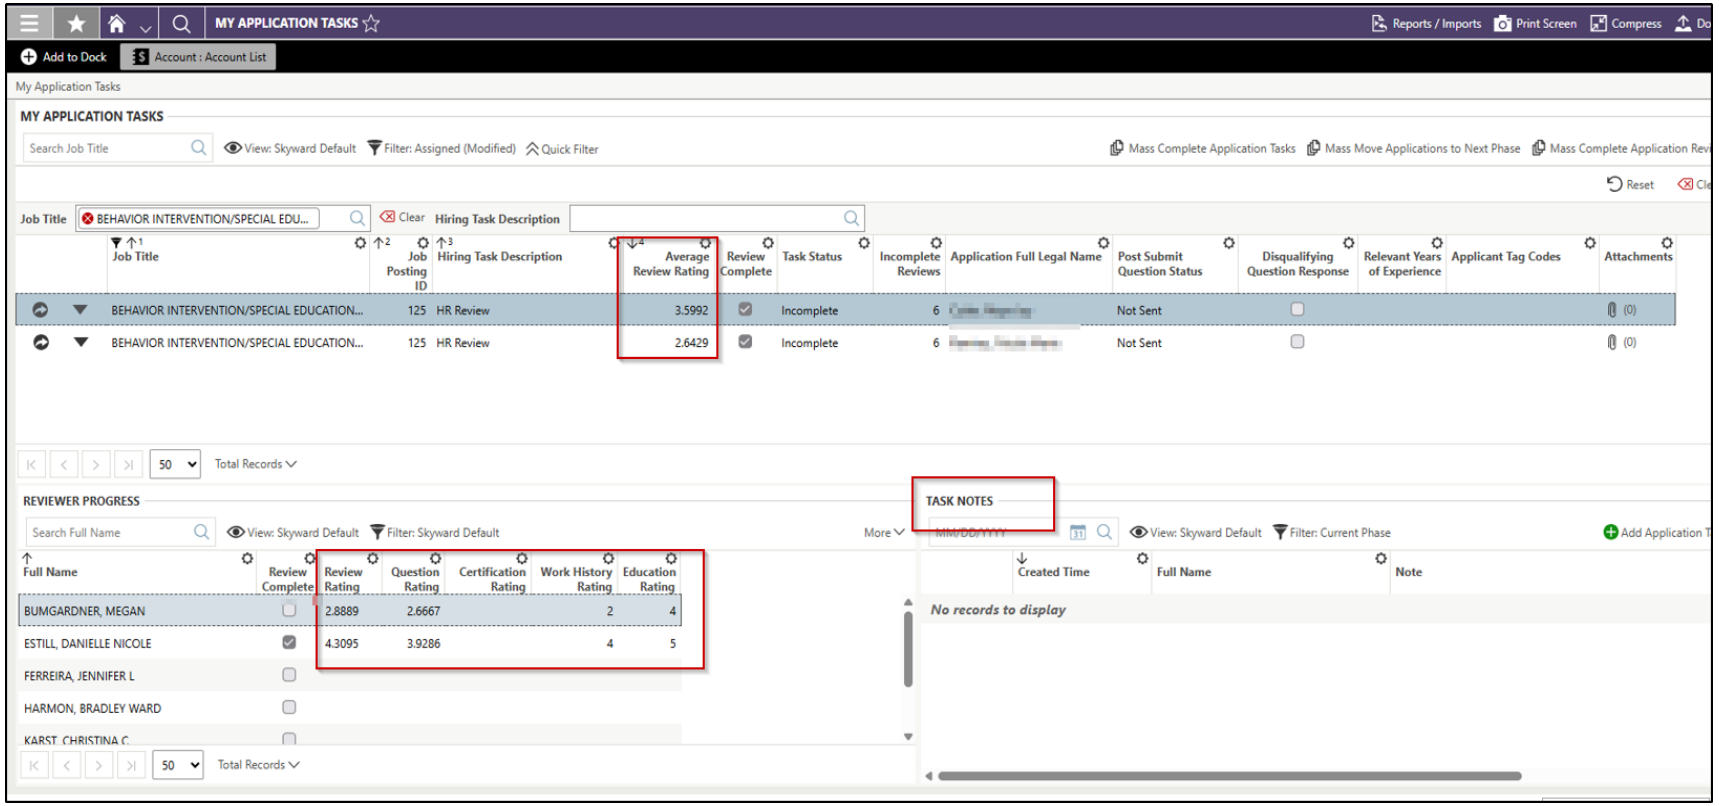

Mass Compare Applications

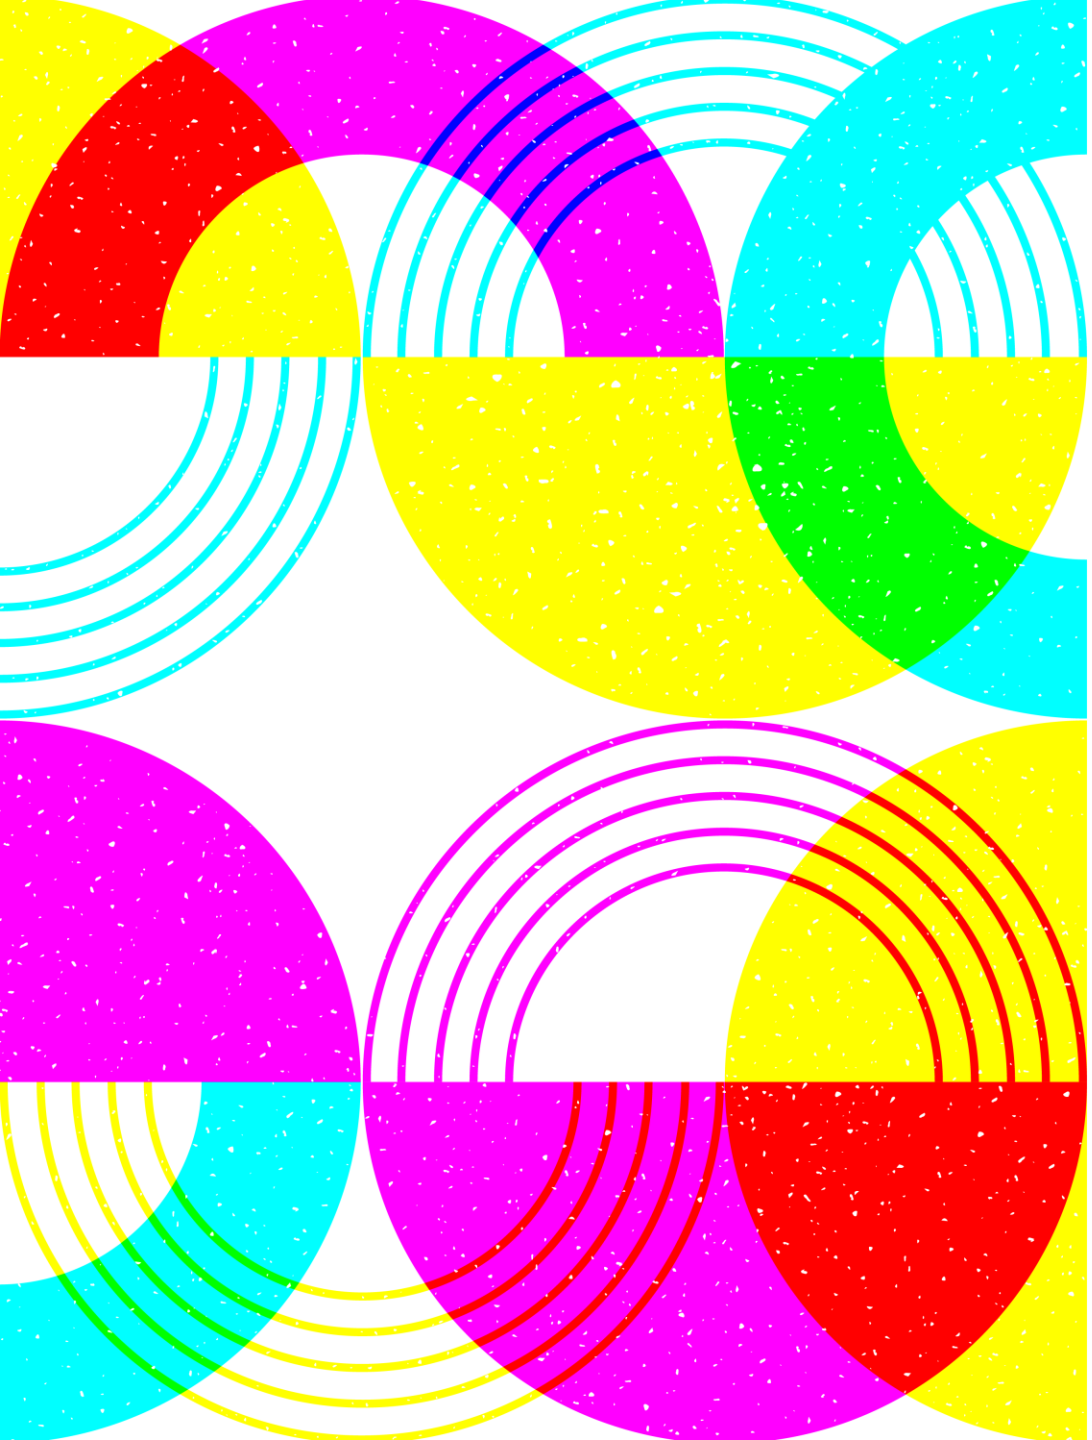

- Easily identify the best candidates by comparing scores across multiple applicants at once

Mass Compare Applications

- Easily identify the best candidates by comparing scores across multiple applicants at once
