Thresholds Unlocked: Turning Data into Action

Ali DeGeorge – SIS Product Line Manager
Kaila Durnen – Solutions Engineer

SIS Mic Drop Moments

- Can’t make it to the final session, or not always comfortable speaking up in a group?We still want to hear from you! Please take a moment to complete this survey. We’ll review the results before the SIS MIC Drop sessions on Friday morning.

Why Student Thresholds Matter

- Thresholds = powerful but underused
- Help districts spot concerns early (GPA dips, attendance changes, behavior flags)
- Move from reactive → proactive student support

What Are Student Thresholds?

- Thresholds are made up of three different areas:
  1. Threshold Rule Group — set of conditions defining criteria (GPA < X, absences > Y)
  2. Threshold Group — combination of rule groups for broader logic
  3. Student Threshold — resulting list of students who meet the criteria

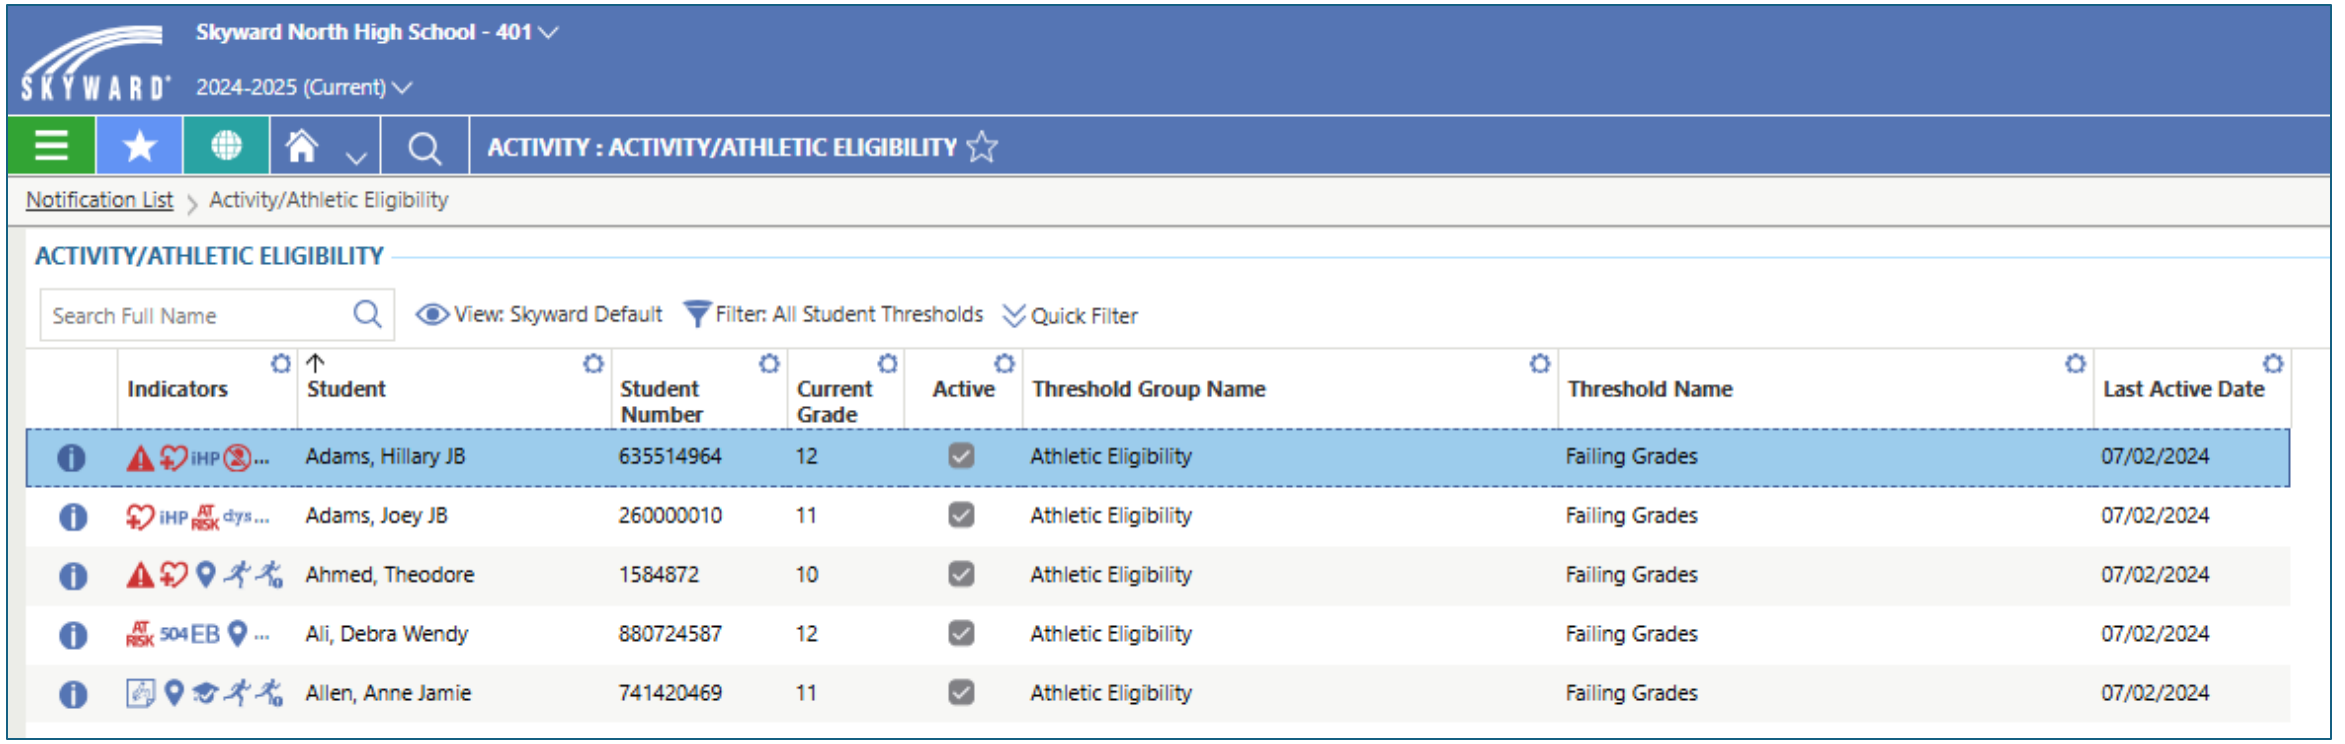

Use Case Overview

- Introduce the main functional areas:
  - Athletic/Activity eligibility
  - Class balancing safeguards
  - Family/Student Access gating
  - Honors & awards qualification
  - MTSS early-warning identification
  - Scheduling eligibility rules

Activity / Athletic Eligibility

- Ensures students meet academic + attendance requirements
- Appears for activity leaders in Activity Access

Class Balancing

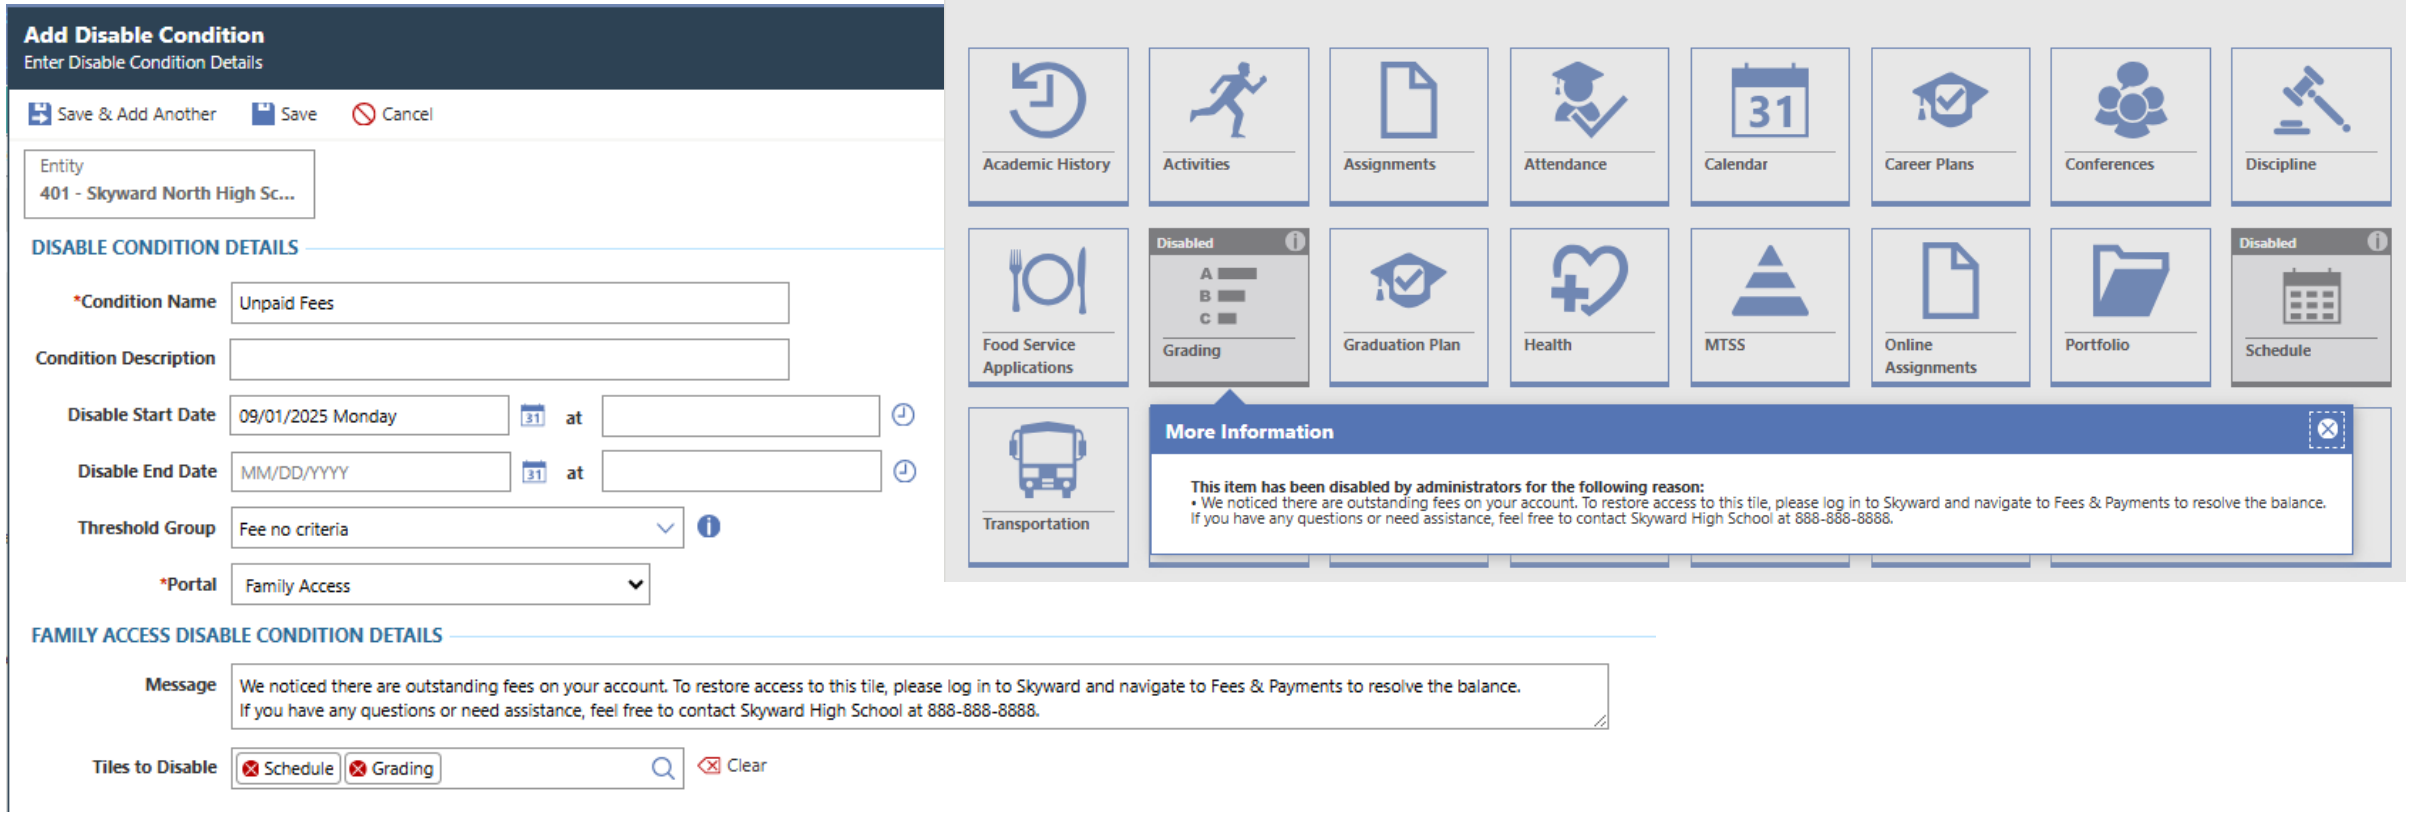

SET LIMITS (E.G., SPECIAL EDUCATION/504 COUNTS) PER SECTION

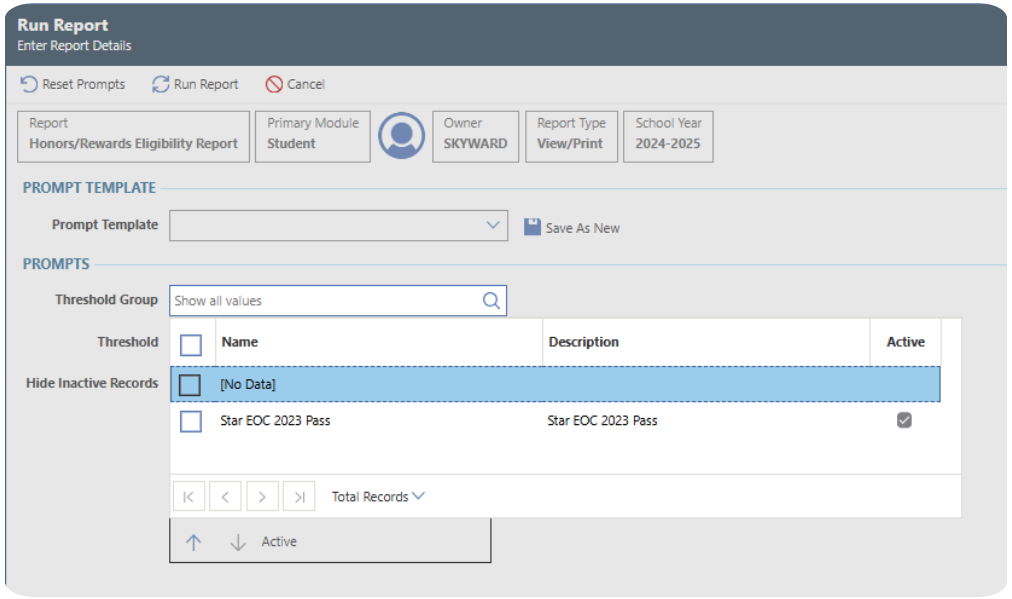

BLOCKS OR WARNS DURING SCHEDULING IF LIMITS ARE EXCEEDED

Family / Student Access Control

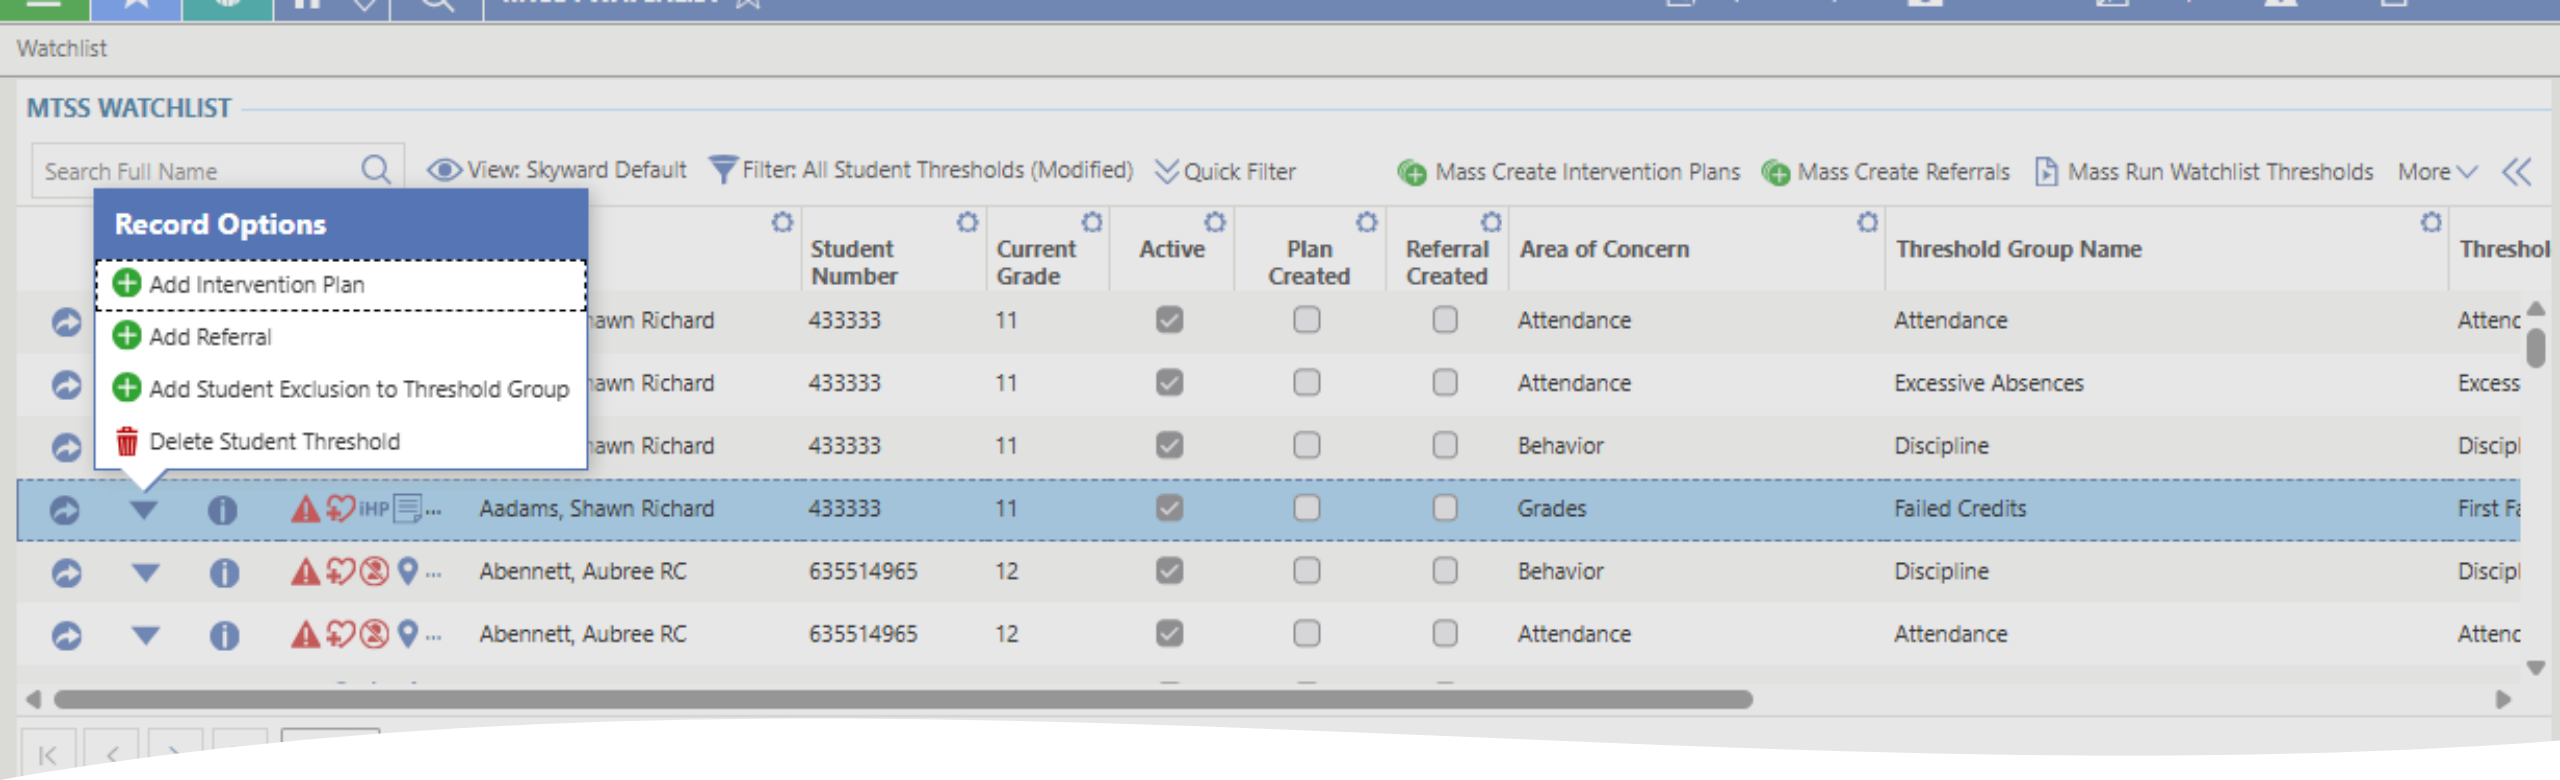

Disable tiles or features until required actions occur (online forms, fees, etc.)

Honors / Rewards Eligibility

- Identify high-performing students via GPA, attendance, etc.
- Feed data into Honors/Rewards reports

MTSS Watchlist

- Flag students needing academic/behavioral support
- Feed into referral and intervention workflows

Scheduling Eligibility

Enforce age/grade requirements (e.g., Driver's Ed age restrictions)

System blocks or warns if criteria aren't met

Walkthrough

CREATING A THRESHOLD RULE

COMBINING RULE GROUPS INTO A THRESHOLD GROUP

RUNNING THRESHOLD CALCULATIONS

VIEWING AND INTERPRETING THE RESULTS

Apply a Threshold

Apply	to scheduling
Apply	to portal access
Apply	to MTSS referral workflows

Canned Student Thresholds

Prebuilt, standard, read-only threshold rule groups

Designed to simplify setup and improve consistency

Online Forms Threshold Template

- “Unsubmitted Online Forms” canned threshold
- Can clone for district-specific rules
- Guided setup experience through the clone process

Fees Threshold Template

- “Unpaid Fees” canned threshold
- Can clone for district-specific rules
- Guided setup experience through the clone process

Best Practices for Effective Thresholds

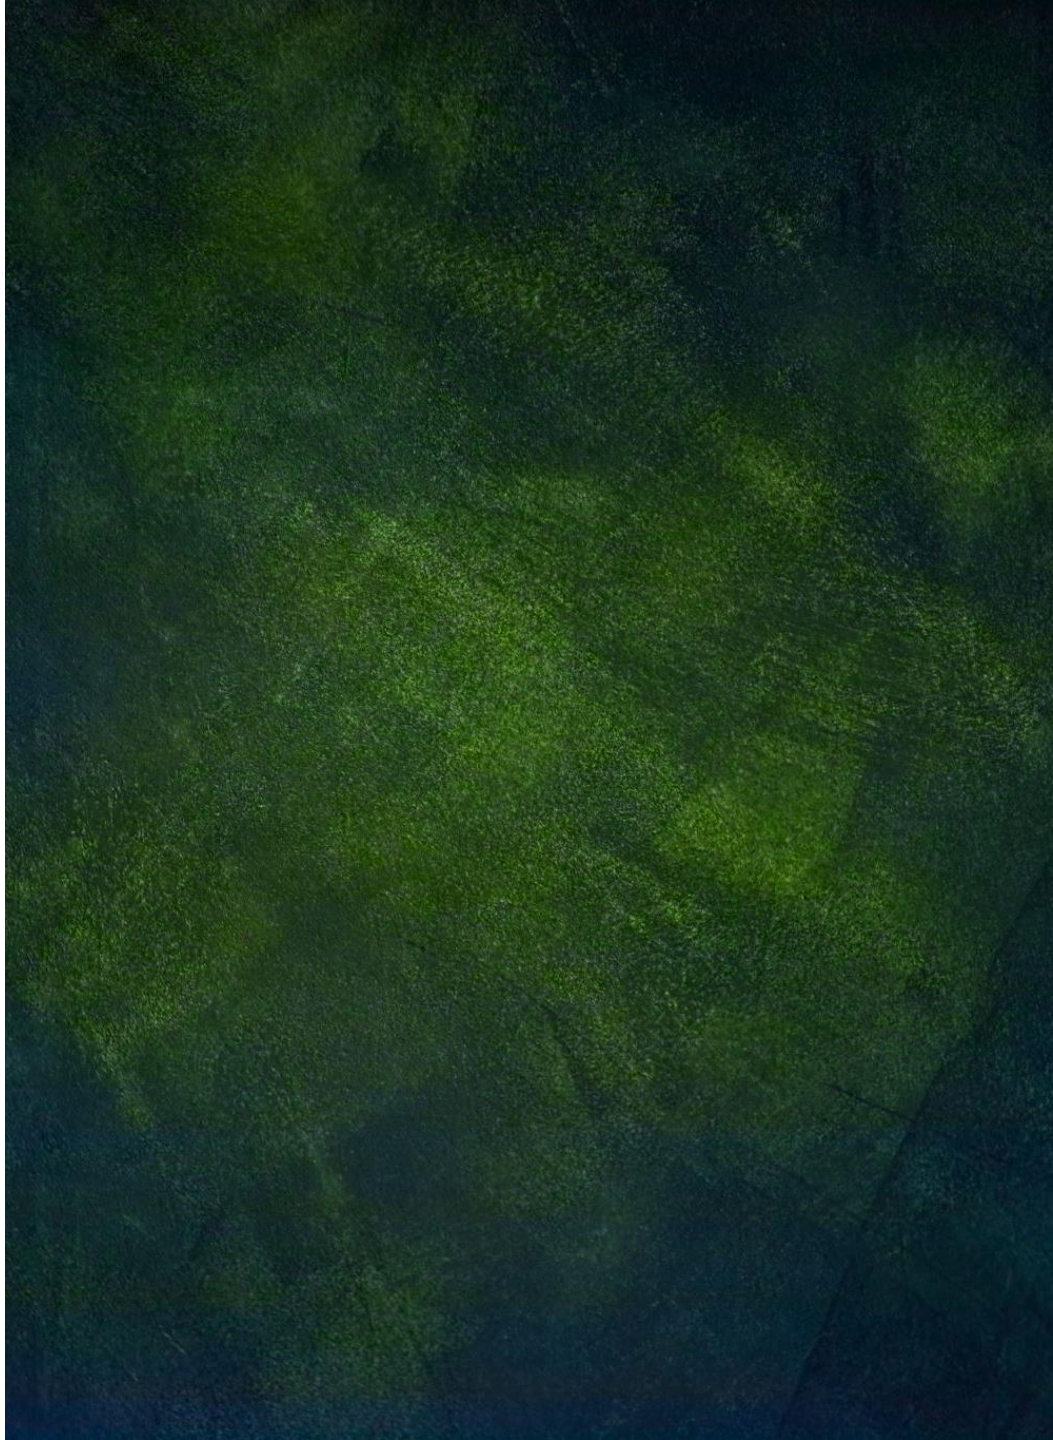

- Define clear goals (eligibility, intervention, workflow automation)
- Keep conditions actionable and measurable
- Combine rule groups strategically
- Review thresholds each term

What’s Coming Next

Streamlined setup with more canned thresholds

Custom indicators that appear on student profiles

Greater visibility + easier workflows

Awareness & Understanding

How familiar are you with thresholds?

What helped/hindered learning them?

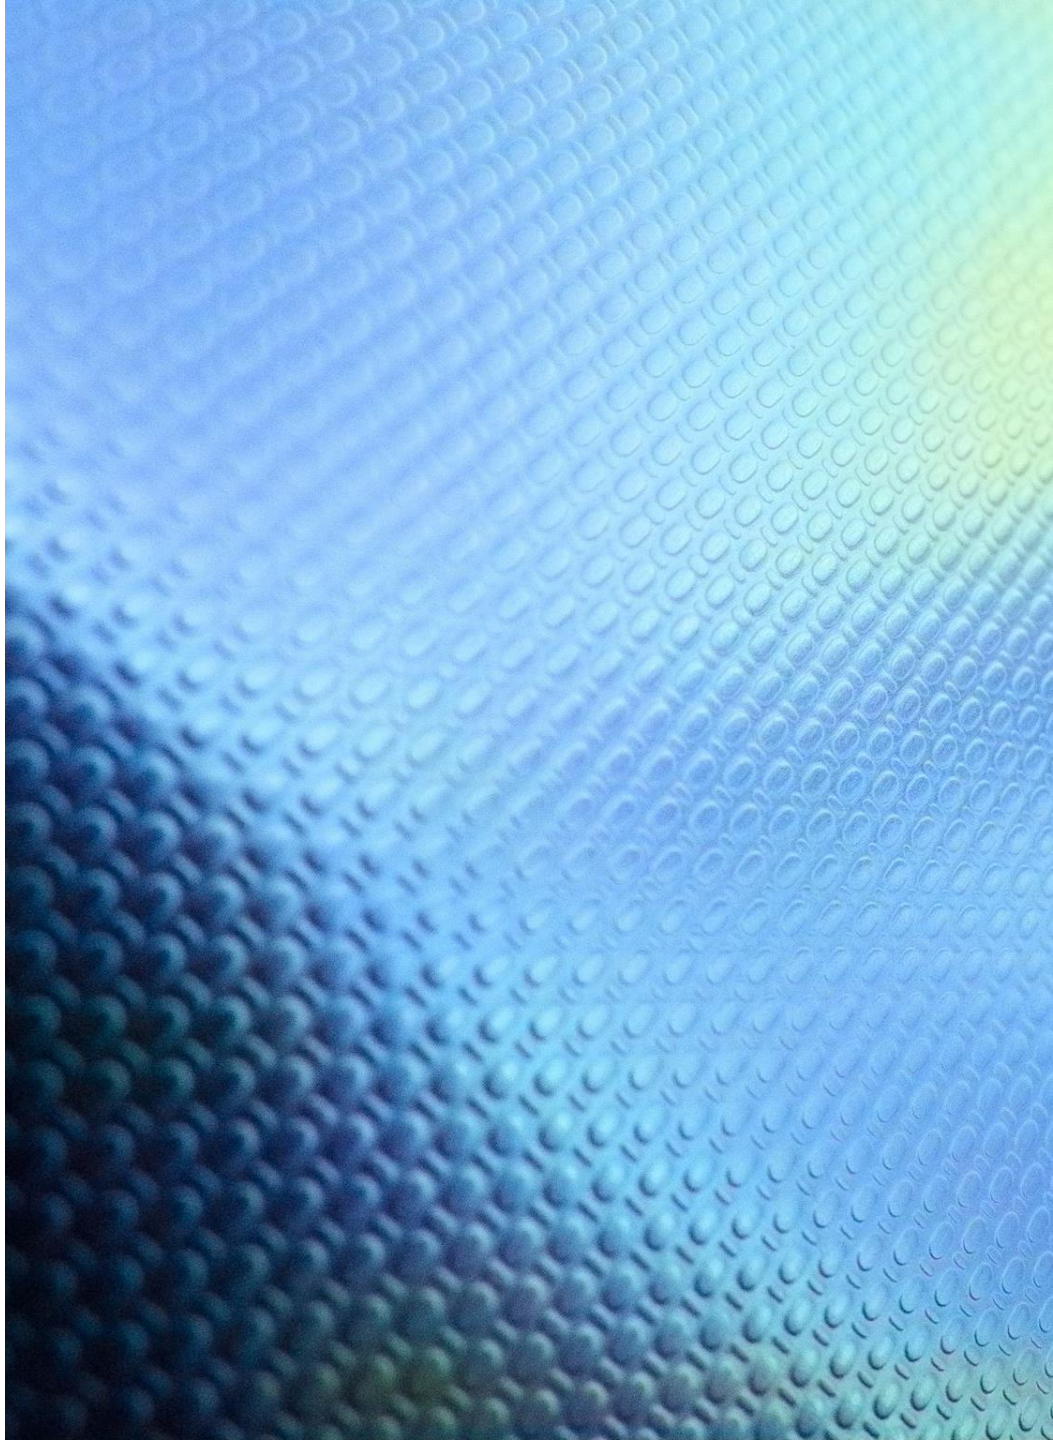

Is current documentation enough?

Usage & Value

Who uses thresholds today?

What works well?

What's missing or difficult?

Expansion & Innovation

- What enhancements would you want (automation, dashboards, alerts)?
- Other areas where dynamic grouping could help?
- Interest in sharing templates across districts?

Final Reflection

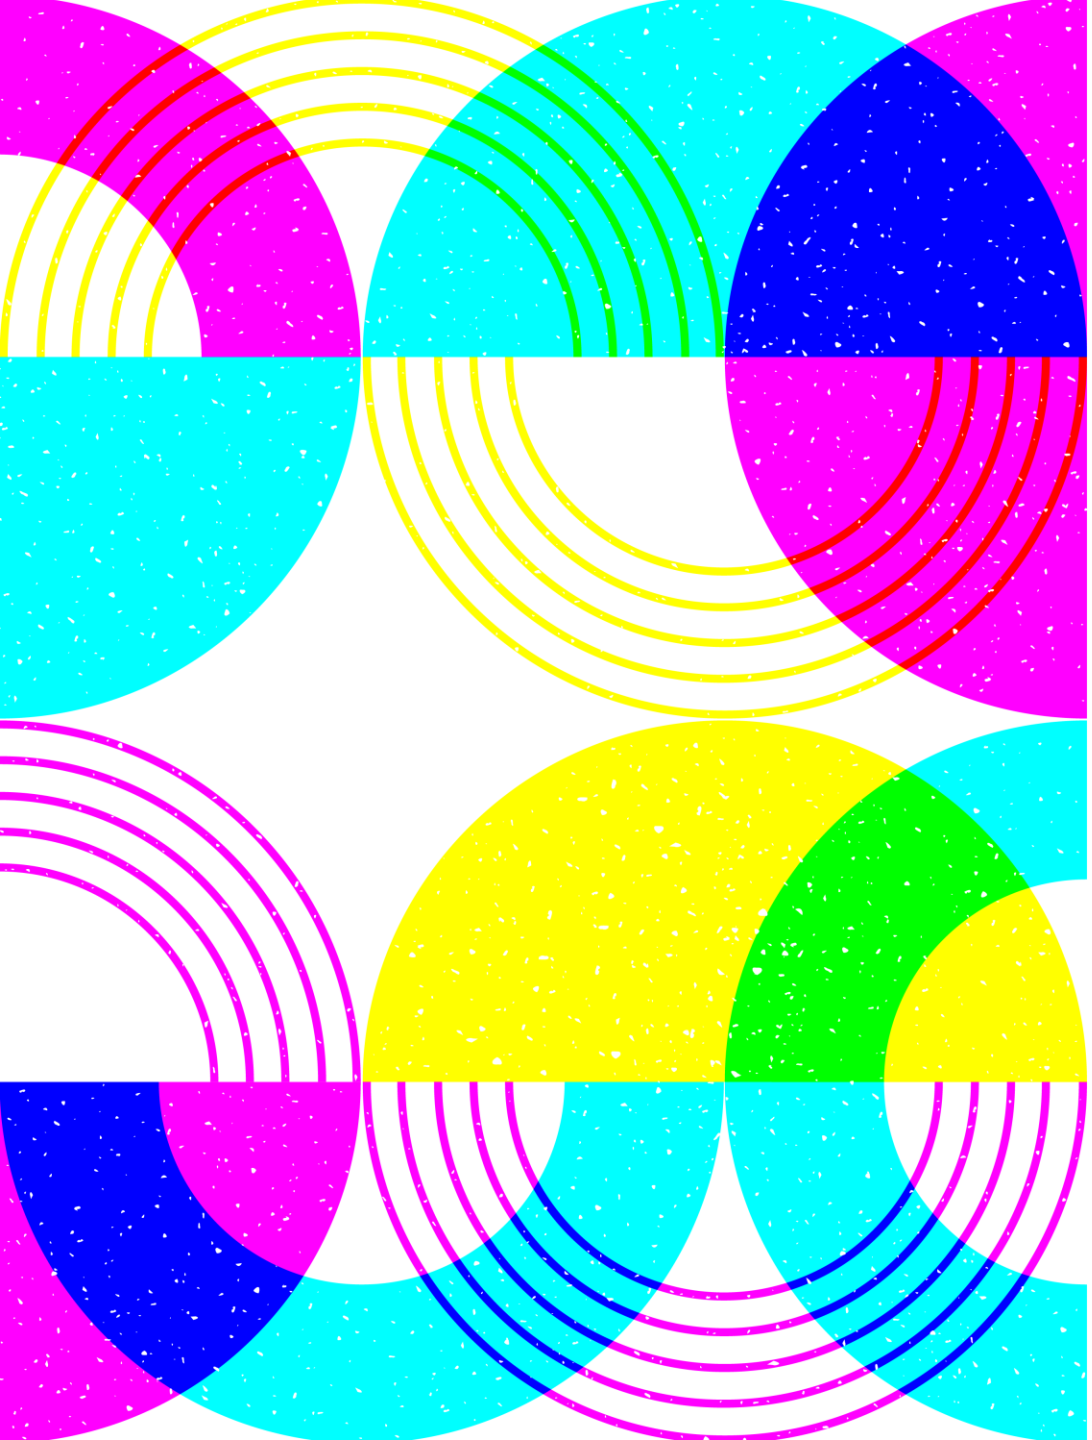

What would make you use thresholds regularly?

Is the term “Student Thresholds” clear or confusing?

One piece of advice for a district just getting started
