

INTEGRATION PARTNERS

SMS 2.0

Skyward has developed meaningful relationships with key business partners in order to add value to our product lineup by providing interfaces with commonly used third-party products. While these interfaces are not a requirement to successfully run or utilize Skyward technology, they can certainly add efficiencies if you are already using any of these products in your current business practices (additional costs may apply).

For those using the Student Management System, you can use Skyward's powerful Skybuild ETL technology to schedule or manually invoke any of our dozens of canned imports/exports at your preference. The flexible technology design allows for custom scheduled exports and imports using thousands of fields within the database.

In addition, Skyward's event-driven SIF agent can provide the flexibility to publish a wide variety of SIF objects to other SIF subscribers. ODBC/JDBC are the most commonly used connections to read or write data from the Skyward database.
